**Subject:** HSCA Sec. Classified Files FBI-originated documents  
As you know, Debbie Beatty has come over to take a look at the huge amount of work Kevin put into identifying FBI records in the HSCA Sec. Class. Files. But she's a long way from being able to clear them for release. Kevin is of a mind that if we could take the records to the FBI they would get processed much, much faster. What he has in mind is physically accompanying the records over to the FBI so Debbie and Co. could work on them, bringing them back the same day. Initially, I thought this would be impossible (eg, getting permission to take the records out of our SCIF) but, having talked to Kris Wilhelm about it, it may not be so hard after all. Kris thinks we'd have to talk to and/or write a letter to Diane Dimkoff to secure permission, but that she'd probably say yes. If it makes sense to you to go this route (which I would endorse in the interest of making progress), please let me know and I will: 1) call Kris again to confirm her thoughts on how best to proceed, and 2) draft a letter to Diane. FEEDBACK REQUIRED
