**Subject:** Possible Autopsy Witness  
Dave, we need you to locate the present whereabouts of the former Head of Neuropathology at the AFIP (Armed Forces Institute of Pathology), a Dr. Richard ("Dick") Davis. He was head of Neuropathology at AFIP in 1963. One of our deposed witnesses (Dr. Boswell) stated he was present at the supplemental examination of President Kennedy's brain. (Don't mention this to anyone outside this building.)I do not have an SSN. I assume that Richard Davis was a military officer. I cannot tell you whether he was Army or Navy. (Even though AFIP is located at Walter Reed, an Army hospital, it was and is a joint-service organization, staffed by medical people from the Army, Navy and presumably Air Force.) I do not know where he might be living now, or whether he is still alive.Good Luck. This is "high priority," in that it would be most useful for ARRB to be able to interview Dr. Davis prior to our deposition of Dr. Finck.
