Subject: Military/Medical Team Update

The most important recent development occurred on March 26 when members of the military team procured from Suitland the microfilm records of the Pentagon Telecommunications Center for the years 1963-4. These records (nine cartons containing approximately 800 rolls of 16mm film) contain the messages sent or received by Pentagon agencies during that period. Since these records go up to the Top Secret level, we are pleased to have gotten the cooperation of the Army's Center of Military History, which has is storing them in its secure vault and providing ARRB staff free access to them in a classified research area. Other recent developments include the initiation of a Research Project on the 112th MI Group (Dennis Quinn is in charge of this), which will include not only records searches on its activities (including any liaison with USSS) but eventually interviews with former unit members. Recent interviews/correspondence. Janet Travell (JFK's personal physician, phone interview); John Stringer (autopsy photographer, phone interview); Ida Dox (HSCA medical illustrator - letter sent); Robert Kirschner (letter sent; will review photos/x-rays on April 11); Robert Karnei (letter/phone, will do interview in late April or early May); Colonel Daniel Marvin (letter sent/received); James Powell (letter sent, Wray to interview in California on April 12); Ann Caracristi (April 10 interview).
