**Body:** Thanks a lot for the response language to Paul Byrne.I hope the guy in California who said the press release by e-mail was "jumbled" was able to at least read it. I think I figured out why it happens (in two-paged releases anyway.) When "-more-" is centered at the bottom of page one in WP, it centers everything below it once copied into Lotus Notes. Also, the text sometime gets separated once in Lotus Notes (e.g. a paragraph will be split into two paragraphs.) This can be fixed before sending, so hopefully it won't happen again.
