Ok here is the plan, (I think) Go to the new view by meeting docs open in full by box. Run the AutoVote macro on them with Archive, then run the assign them to a meeting for accept docs macro. That should put all 86 in the right place. Once that's done and you have all the docs in the By Meeting Ready for Archive by box view. Assign all the buddies to the meeting again by using the new Assign to agendaDate ONLY macro. Ok. Now we are rolling. Then use the Voting macro Renumber postponements. To use it Select just RIFS then run the macro. When it's finished you will be in a view with 0 docs that's ok (I still need some clean up on this) Switch back to the Meeting Box Archive view and continue. I have added the Action date to the above view to help with checking dates. Any that are wrong you can fix by edit or running the macro. Once all this is done, Select the rifs and print out the determination summary (new 4-4-96) I have not completely tested all of this so let me know how it works out. I will redo any problems over the weekend so we can try again on Monday.
