Subject:	Postponement numbering problem
Body:	The document in question is 104-10004-10063. When you compose a Determination Summary for this document you will notice that the postponement details are numbered correctly. However, the last postponement detail, number 10, falls numerically after number 1 and before number 2. Therefore, there needs to be an adjustment made in the formal determination sorting mechanism because it is reading 10 as coming before 2 instead of 10 coming after 9.As usual, thank you for your assistance.
