Subject: Scelso Postponements

As we discussed, a "Scelso button" on the first page of the Postponement detail form will help greatly to reduce the data entry requirements for the large number of documents which contain this postponement. It should fill in the 1A postponement, Vanilla Code 02, Routine postponement, POSTPONE, the Scelso substitute language, the basic 1A postponement Board reason, and 05/2001 with the appropriate Scelso date language (The postponed information will be opened in full on either May 1, 2001, or three months after the decease of the individual, whichever occurs first.) Then it should forward to the bottom of the postponement detail form. I'll give you a sample postponement detail form which includes all of the appropriate information except the date language.Thanks.
