Subject: Consent database
This note is regarding the view "By Consent Fed Reg Notice Issued.'There is one RIF number for each document in this view, except for a document I assigned to the 06/05/96 Fed Reg yesterday. For document 124-10035-10275 the RIF number shows up for the actual RIF and for each postponement detail. Why would it only do this for one document or did you recently alter this view in some way that would cause this to occur?Thanks for looking into this.
