**Subject:** Referred material in Misc. HSCA record series  
I've put a memo on this subject in your no-action-immediately-required box (which I assume is not a this-is-never-going-to-be-read box.... time will tell!). I have a much better handle on this subject than I did when we spoke this morning -- the situation is less dire than I feared and, theoretically at least, all but the Security Classified Files have already been referred to CIA/FBI. That is, these referred records should be in the mountain of NARA-referred documents sitting at CIA and FBI. It occurs to me that, since we're making arrangements to have the CIA "staffer notes" boxes delivered to us, that we should grab as much of the misc. referred material at the same time as they'll let us have. I have communicated this desire to Kris and she's working on it.
