LOS ANGELES (AP) -- The Soviet Union's spy agency believed that President Lyndon Johnson was responsible for the assassination of John F. Kennedy, according to an unedited version of a 1966 FBI document. The document was released Tuesday at a public hearing of the Assassination Records Review Board, a federal commission established to collect documents on the assassination. The document attributed to an unidentified source the KGB theory about Kennedy's Nov. 22, 1963, assassination in Dallas. "Our source added that in the instructions from Moscow, it was indicated that 'now' the KGB was in possession of data purporting to indicate President Johnson was responsible for the assassination of the late President John F. Kennedy," read the document in a section that previously had been edited out. It did not offer other specifics. Johnson was Kennedy's vice president and became president after his death. The board also made public a request from Marina Oswald Porter, widow of Lee Harvey Oswald, asking the board to investigate his involvement with the FBI. "I definitely think that Lee Oswald did not kill President Kennedy," she wrote. "I think he was given up to pacify people as a patsy.... I believe that the documents I have requested will be eye-openers." Also on Tuesday, the board was given 17 boxes of documents belonging to the late J. Lee Rankin, general counsel for the Warren Commission that investigated Kennedy's assassination and concluded that Oswald was the lone assassin. Rankin's son, James, said the family found the boxes about six months ago.
