Subject: Seance update

Steve Tilley called me late yesterday afternoon and told me the following:-- Technically, he is not in charge of the documents, as they are not yet "Kennedy" docs; the Reference Branch controls them. -- He contacted the reference branch chief and discussed this with him; Steve said that this guy would prefer to conduct the session at NARA if at all possible.-- I indicated our high interest in conducting it at ARRB premises unless it is not legal to do so. I explained that with all the different military entities involved, ARRB HQ is much more central than NARA II. I also remnded him of the precedent set in the past (i.e., both CIA and HSCA classified records are stored here without problem), and suggested that storing the records here might be advantageous to them as well. Steve seemed to agree with me, but obviously, he cannot speak for the other guy involved; he said he would "work on things from this end" and get back to me. -- He thought it might take a couple of days to get this all set up or approved at NARA, so he will be calling me back. He wanted us to know, though, that he hasn't forgotten about us.END OF REPORT
