Subject: Updating source name postponements.

We discussed the possibility of setting up a separate database (as we did for Scelso documents) to update the source names which were reconsidered at this past meeting and the additional source name reconsiderations which will have to be treated in the same manner. I no longer have the S-track database, but if I did my guess is that it is no longer a current version of Review Track anyway. Our needs are: A current version of Review Track to be used only for this exercise A macro which would allow us to select the postponement details The only changes required in the postponement detail form are in the Review/Release date fields- from Review date 12/1996 to Release date 10/2017. Then the RIFs will be marked as reconsideration documents. (I think there is already a macro for this.)This database and macro will speed our processing of documents from the January 29-30, 1997 Board meeting. Thanks for your help.
