Subject: Senor Fox...

Body: I never discussed what photos are known by the research community or what we believe Fox's role w/photography may have been...I did ask if he knew of his father's possible connection w/assassination related events & he then provided the info in the call report...He stressed that though both he & his brother were very proud of their father, Fox really shared most info w/their mother; but he probably collected "different things" over the years...He seems like he'll cooperate w/most any reasonable request...
