Subject: Document-as-a-whole NBR recommendation on reviewtrack

I suggest the following language for the form that would be attached to the RIF for such a document in the public portion of the Collection: "The Review Board has reviewed this record and determined that it is not believed relevant to the assassination of President John F. Kennedy."There should also be a "Description of Record:" field, which would draw on the descriptive "writing" that the analyst has entered into the reviewtrack.Finally, I guess the form should show the "determination date," or whatever we call the date of the Board meeting on other species of final determination forms, and a "release date," which will be 10/2017.
