**Subject:** Possible Intern Project  
David recently created a view in the HSCA/Church database that identifies 313 records in the HSCA Numbered Files that apparently were not processed by the Board. It appears from the RIF's of these documents that they were referred by NARA but their current status is unclear. It is possible that many of these documents currently are open at NARA II but somehow escaped processing through our computer tracking system. The best way to determine whether this explanation is accurate is to physically search for these documents in the stacks at NARA II. I discussed this idea with David and he seemed to agree that it would be an excellent project for the kids. Let me know what you think. Thanks.
