Subject: new Marion Zimmer Bradley book

I was wandering in Phoenix's Borders today, picking up a copy of the Irish Times and checking to see if some old Van Morrison albums that are getting reissued in CD format were out yet when I stumbled across a new book by Ms. Bradley: Lady of Avalon . Apparently, it's a pre-quel (is that a word?) to The Mists of Avalon, set in Britain during (I think) Roman times, dealing with the origins of Avalon, etc. I haven't started it yet (I am only a quarter through a wonderful new biography of Gladstone) but will let you know if it comes anywhere near the wonderful book I would never have read if it weren't for you! Hope all is well.
