Subject: Omnibus
I think the data is ready for you. - I split the postponement details that contained multiple N-codes. - Michelle added additional pending names and a few Prior final action names to protect. - I added names that were previously released, some as releases and some as pending. (For those I entered as releases, the documents that contain prior releases are the only records in which those names appear. For those I entered as pending, there are other records in addition to those where the releases are.) At this point it seems that we will notice the releases, as we had discussed, but that could change.-You may notice some language which seems inconsistent: "Prior Final Action, Prior CIA release, Prior release." This was intentional, so that different groups of records can be identified, if necessary.Good luck.Thanks.
