The vast majority of these records have not been reviewed before by any committee that has investigated the assassination of President John F. Kennedy. The staff reviewed documents from over 160 FBI files and located approximately 80 records that it believes should be included in the JFK Assassination Records Collection at NARA. In addition to its review of these files that the FBI produced in response to the staffs requests for additional information, the staff prepared 250 FBI documents for presentation to the Review Board and reviewed another 100 documents and discussed outstanding issues with the FBI staff.
