**Subject:** Church memo

Here is the latest version, per your request, though you may find it easier to just add the following sentence in whatever version of the memo you are currently working in. At the end of the overview section I added: "The vast majority of the FBI/Church Committee records are, in fact, unrelated to the assassination, consisting mainly of administrative files relating to the voluminous document requests made of the Bureau by the Committee, as well as substantive records regarding non-assassination-related subject matter within the Committee's writ of domestic intelligence abuses (e.g. FBI surveillance of Dr. Martin Luther King, Jr., or the development of the so-called Huston Plan)."Hope that helps. Let me know if not. And thanks for your input on the conference call -- even though you did not directly assuage my fears that I talked far too much about far too little, you nonetheless made me feel better!!
