Subject: McNamara

I spoke with Cary Conn from NARA re: pulling boxes for tomorrow. He asked if I had "Q" clearance. I assume that I do not, as I did not know what it meant. He explained that "Q" material contained Atomic information. He also mentioned that roughly half of the documents contain RD (restricted data) material, which would have to be screened before I could view it. I told him that I would consult with you and/or Tracy regarding my clearance status. Mr. Conn will be in touch as he ascertains the size of the task of screening documents. In short, the documents may not be ready for me tomorrow.
