**Subject:** Fast Track

I needed to update some records in Fast Track to reflect additional releases. In the past, I have made such changes in the view that shows the older style RIF. In this case if made the changes to the Fast Track RIF. There were a couple of problems.-First: When I tried to create a Special Notes in the FT BY MEETING FORMAL NOTICE view, a blank RIF document appeared instead of the Special Notes form.-Second- and more of a concern: When I made the changes to the Fast Track RIFs, they disappeared from the database. They do not appear in any view, not even BY RIF AND OWNER. (I will try again later to see if a search will locate them.) In the meantime, I recreated the RIFs in Fast Track, assigned them to the meeting, and cut them into Archive. I have two concerns here: first, that we act to insure that the problem of disappearing RIFs does not reoccur; and second, that we check to be sure that there are not multiple copies of these records in the database. -The two documents in question: 104-10100-10240 and 104-10103-10328.
