Subject: inquiry from the public
I got a call from a man named Rick Russo who would like to find out about the existence of a Senate judiciary committee to investigate the deaths of JFK and RFK that supposedly existed in the early 1970's. If it existed, he would then suggest that we pursue the acquisition of its records.He said that there are references to this committee (Eastland Judiciary Committee) in HSCA document number 180-10084-10378 and FBI document number 124-10246-10355. He first learned about the possible existence of this committee when reading "Legacy of Doubt" by Peter Noyes.Do you know anything about this?
