Subject: Fax and other things.

Body: I have install the printer on the Jobs computer. I have posted some very simple instructions on the wall next to the computer but both of you might want to take some time to work up some clear ones. (I typed them in 35secs)The machine will not fax, the software does not support it. The SF171 seems to need legal paper to print to we will need to supply that at the back printer.Peter you might want to teach people how to save the Jobs items onto a floppy. Tracy are we supplying floppies?Good luck and I will see you early Friday Morning.
