**Subject:** Gus Russo

Gus Russo called today to pass on to us a couple of leads. He apparently talked to Jim Hosty earlier this week and Hosty told him that he (Hosty) is still very interested in finding out whether the Navy/Marines wrote up a damage assessment after the assassination. I know that you have talked to Hosty about whether that assessment exists. Anyway, Hosty told Russo that he had spoken to Larry Keenan, ret'd FBI agent, and Keenan said that it is "common knowledge" that the Navy shredded the assessment shortly after the assassination to avoid embarrassment to the Navy. Russo thought that if we were interested in tying up the loose ends on the damage assessment, we might want to ask Larry Keenan where he heard it. I told Russo I would pass the tidbit along to you, so here it is. Thanks.
