Subject: Fast track and Review Track archive

A number of things remain that do not work on the Fast track documents when they are in Review Track archive. -The lost document fix is, I think, only partially effective. It does restore the document, but it seems that there are still problems with the special notes attached to the document. The Special notes were transformed into blank RIFs in the process. -Also, the comment field does not seem to work for the final determination form. Pete was able to generate a form manually, but the ideal is for this to be automated so that the comments cannot be overlooked. When I tried to make a RIF that used the comment field, document was almost totally blank- no comment field, no substitute language codes. Can this thing work?
