**Subject:** IRS project

I have spent this morning in the SCIF looking for Marina's number. I have looked through a majority of her documents and could not locate a number. I am planning on stopping by the FBI for an hour after lunch to finish some referrals for Debbie and to discuss a file with Dave. I should be back by 2 ish to continue working in the sciff. I anticipate finishing a review of the HSCA documents will take me at least two more days. I asked Jim about FINCEN's ability to find social security numbers for the five people I completed yesterday but was unable to locate a social security number and for the six people I have yet to complete. Jim said that with detailed information such as a persons full name, Date of Birth, Place of Birth, last known address, and spouse name he would be able to locate many of the social security addresses even for many of the people who are dead. The FBI documents contain this information. Could this process be more advantageous for us?
