Subject: Your memo to Jeremy

Thank you, or whoever was responsible for forwarding it to me here in Phoenix! It was very helpful and I expect to use some of your information in my draft of Chapter 1. I think it places the country's widespread skepticism regarding the official version of the assassination story in a useful context. The assassination, of course, no doubt helped create the climate of mistrust, which in turn became a prism through which official pronouncements regarding the event were subsequently seen/distorted.(I wonder how much polling work has been done over the years specific to JFK's assassination, ie. support for the Warren Commission findings, belief in conspiracy, etc.?)Thanks again: it was really good work! But be careful not to let them work you too hard! (That Denk person, in particular, can be pretty rough to work for, I hear...)
