I would like to try to avoid having to write another appeal and I think we ought to try to get the records processed in a low-key way before we turn up the heat and request a box of supporting documentation on why PFIAB is or is not subject to a multitude of information laws. (Yes, I realize we have been trying to play ball with them for some time with no luck, but I'm hoping they will respond to the Board's vote to designate their records as assassination records.) Please do not delete from your computers the excellent paragraphs that I am removing from this letter. Depending on how PFIAB responds to this letter, we may need to send a much more serious letter including the more combative paragraphs next week.If you have additional thoughts on this, I would be more than willing to talk more about it in the a.m.Thanks,Laura Record N
