Subject: help, urgent!

I brought my laptop in on Tuesday for you. Where were you, dude? Anyway, I need to have PC Anywhere put on it. I also was having a problem with the replicate locking up over the weekend and then a problem getting into windows. I was hoping you could look at that also and then I realized that it might be a docking station issue. In any case, if you can take a look at it and see if it is something you can fix or not. I left the laptop in my office (code 2, 5). I will be at the Archives for at least the morning if not all day on Thursday so won't be in the office to see you about it. Could you please work your magic and leave it for me in my office so I can take it home on Friday for the weekend? Thanks. Also, you and I need to talk very soon about our computer inventory and when we can take down some of the setups and send them out of here. Also, how many Pentium's do we have and how many of those have been promised to Steve? And, more questions like that. So, if I don't make it in on Thursday can we block out Tuesday mid-morning of next week? Thanks and I'll talk to you on Thursday if I'm not going to make it in.
