Subject: CIA Req19, Draft 2

Body: To: Jeremy Gunn/ARRBcc: (bcc: Non-Record/ARRB)From: Irene Marr/ARRB Date: 01/23/97 04:07:43
recstat: PMSubject: CIA Req19, Draft 2In addition to this letter, I am preparing a chart which lists what we have on the various surveillance projects. In addition to doing a database search of the Sequestered Collection and looking at the index in SCIF, I also sifted through the R.H. Collection and listed any document that was cross-referenced to a JFK box and file number. (Some of these records are in the boxes that have already been processed and thus not easily accessible, so having an RH copy is helpful.) I believe there is more on this subject in the RH files than in the Sequestered, although much of it falls outside the time frame of interest and under a new name, but as those might not end up being assassination records, I refrained from listing them. I'm not sure you'll end up raising this request with Barry tomorrow, but I'll have a preliminary chart for you in the morning in case we are accused of asking for something we already have.
