Subject: Re: More questions

On your program manager desktop find the startup folder, double click to open. Click once on the clock icon then press the del key. You should be prompted to delete the clock.say yes.exit windows and reboot the computer, This will get rid of the clock but the mouse thing needs to stay to run the mouse program.chetI will talk with you about the other issues.To:Chet Rhodes/ARRBcc:From:Jeremy Gunn/ARRB Date:02/14/95 02:04:40 PMSubject:More questionsHow do I get rid of the mouse and clock when I am doing an ALT-tab back and forth between WP and Lotus? I don't use them and I would rather not have the bother.
