Subject: Re: ARRB Library

You can print out a view, by selecting print from the file menu than in that box select print view and press ok. If you need to print each document out than I will show you that on Tuesday. I also worked on the checkout feature and added a button for that in the form. Try this by double clicking on a book in the view and you will see the button at the bottom of the form. The view of who has the books still needs some more work but I think we are close. I still have not got a way to easily copy the info but will try again next week.
