Subject: Re: fbi meeting items

I'm don't think I have anything that fits this category, although I really don't understand fully (or even partially) what this is about. To: Kevin Tiernan/ARRB, Joan Zimmerman/ARRBcc: Noelle Gray/ARRB, Jeremy Gunn/ARRB, Anne Buttimer/ARRB From: Phil Golrick/ARRB Date: 08/16/95 01:42:25 PM Subject: fbi meeting items 1) To the extent that you had documents in your "piles" that are newly released in full by the FBI, please give copies of these documents to Noelle so that she can enter symbol numbers, etc. into the "released" database on the review track system. (I have delegated to Kevin the task of doing this for my old "pile.") 2) Please commence with re-reviewing the documents in your "piles" in the light of the supplemental evidence/arguments provided by the FBI this morning. Let me know if you are unable to get access to our prior entries for these documents on the review track database 3) Please go through the documents in your piles and make a list of the names and any other particularly identifying information (e.g., addresses) of informants (including "protect identity request" types). Do NOT identify them as informants on the list you create OR associate them with the particular assassination records in which they are mentioned. We are thinking about running FINCEN searches for some or all of these.
