~ ~ ~Weekly Update For Week Ending 09/29/95Completed by Dave Montague for Anne ButtimerAnne:
* Attended a Dallas media/Dealey Plaza witness planning meeting with David, Tom and Dave. Dave is
pursuing Dealey Plaza witnesses and related information, Tom is contacting Dave Powers, and I've initiated
contact through letters with the Dallas Public Works Dept. and Dallas Tax Assessor's Office. These initiatives
are all intended to find new assassination records and to provide information for media announcements for
the upcoming 32nd anniversary.* On Tuesday afternoon I flew to New Orleans. In my first two days and
evenings of interviews I've spoken with eleven (11) people concerning records. I'll be spending all day
Friday at a warehouse reviewing Metropolitan Crime Commission records.* I completed interview
appointments for my trip in October to Tampa, St. Louis and Chicago.Dave:* Attended the Dallas Meeting in
which additional plans were laid out concerning actions around the time of the anniversary of the
assassination.* Conducted an initial interview with James Tague. I sent him an information packet about the
Board & he will answer my questions after he has an opportunity to review it.I will pursue medical & other
related records with him.* Contacted Cindy Palmer who is the sister of Gayle Nix Jackson in Texas. I have
made numerous attempts to reach her and will continue in order to ask about any other records or leads on
the Nix film.* I am negotiating to gain access to the Bettmann Archives' collection of records which they
acquired from UPI. They claim they have no official inventory of the records, but that I may do my own audit
of their records. They (so far) deny knowledge of the Nix & Muchmore films; I have researched several related
articles and found much contradiction between the parties involved. I hope to schedule a visit soon to
perform my accountability.* Contacted the Los Alamos Lab in New Mexico & their Special Assistant to the
Director is conducting a search for any information regarding the acquisition, analysis & return of the Nix film.
They seem very cooperative & have indicated they will still be supportive of our efforts to acquire records
from them even if it initially appears that they might not have any.* Designed a checklist for a new form in the
Gumshoe database. This form would allow the quick accountability for witnesses as well as photo, audio,
video, paper & other types of assassination related records. It is expected that this form will soon be on-line.*
Interviewed Dale Myers concerning his computer simulation of Dealey Plaza. He is willing to provide data
used in the creation of his simulation to us, but is concerned that it may be released & ruin his on-going
Record
