Subject: Re: Answer to question
Thanks.Follow-up questions.1. How many other fragments (including CE 399) were identified (e.g. from the limo, Connally, Harper fragment, etc.)?2. What tests were conducted on the fragments during the Warren Commission era.3. What tests were subsequently performed (by HSCA, etc.) on any of the fragments?

Subject: Answer to questionTwo bullet fragments were received by the FBI lab from Agents Siebert and O'Neill. The fragments were taken from the president's head during the autopsy and were in the custody of the agents from the Baltimore field office until they were turned over to the FBI lab on 11/23/63. (FBI laboratory worksheet, 11/26/93.)
