Yes, President Clinton has been supportive, as demonstrated by the fact that the White House provided \$250,000 start-up money to the Board, prior to funding being voted on by the Congress. I have added your e-mail address to our group list; you should receive mail from me within the week. Thank you for your interest in the work of the Review Board. Sincerely, Eileen A. Sullivan

Eileen, I would love to receive documents, etc. from your committee. I was 12 when the assassination happened and I remember sitting those four long days with my mom watching everything. I have read most of the major books and it is one of those areas in life I wish would be resolved definitely before I die, but I suspect it won't. Has Clinton been supportive of your committee?
