Subject: Re: Clay SHAW

This is very helpful. Make sure that our letter to CIA (CIA-10?) refers to both QK and QN and also include the Shaw file number. Do you see any reason for holding back for a few days before sending CIA-10?To: Jeremy Gunn/ARRBcc: Christopher Barger/ARRB From: Manuel Legaspi/ARRB Date: 04/05/96 04:29:47
PMSubject: Clay SHAWFYI: I examined the two folders of Clay Shaw materials which are part of the Segregated Collection at the CIA. We flagged several items which were of interest (these will be copied and given to us for research purposes on Monday) , including:1) Shaw's Covert security clearance number and the mention of project QNENCHANT, (We have made some preliminary, informal information requests on this lead) (Also, it appears that QNENCHANT, not QKENCHANT, is how that particular CIA document referred to that program)and 2) Shaw's corporate contacts in Europe.I will report on these items further when we receive them on Monday.
