Subject: Re: Another NSA matter

I presume that all of the letters should be reviewed by the Board at the same time. NSA needs to be advised, however, of the status of the various documents. To: Jeremy Gunn/ARRB, Tim Wray/ARRBcc: From: Joseph Freeman/ARRB Date: 08/16/96 02:16:33 PM Subject: Another NSA matter You'll recall that when NSA made their presentation to the Board, they indicated a desire to postpone some information in a letter the HSCA sent them (they were dealing with the copy of the document in their own files: a 144- series record rather than a 180- series record). You'll also recall that that very same letter (from the HSCA's files) was processed by NARA and sent out to the public collection at NARA II back in 1993. When the time comes, our Board will presumably open the 144- series version as a function of its already being in the public domain in the HSCA collection. In the meantime, I have come across another iteration of the letter in a different HSCA file. In this latter case, however, NARA did refer/postpone it and so it is not in the open boxes at NARA II. Normally, I would put this latter record in Review Track and on the Board's agenda as a green (duplicate of open record) item. Given the interface with the 144- series document, however, should I : 1) leave it alone for the time being, 2) include it as a referred document (even though its already open elsewhere) in the latest letter to NSA (which will inevitably drag in their 144-series version, as well), 3) send NSA a separate letter on the various iterations of this document, so as not to confuse everyone (including us), or 4) just clear this latter HSCA document as a green item and leave the 144- series version until later... Please advise.
