Subject: Re: Personal info on the net

That is the fax number that I put on the e-mail today that I got from CBS local news last night. The instruction from the reporter was that you had to give your name and ssn. Today I sent a request to remove my name and my daughter's and got a confirmation that the fax went through, but I gave the ssn (guess it doesn't matter because they already had it anyway).To: Allcc: From: Mary McAuliffe/ARRB Date: 09/20/96

03:54:23 PMSubject: Personal info on the netAs of this afternoon, when I called Lexis, they no longer take your request to remove your name & personal information over the phone. You have to snail mail, e-mail, or fax it. The fax number is slightly different from the one Kevin sent around--it's 513/865-1930. Don't give out your social security number--all they require is your full name and current address.
