**Subject:** Re: NSA

Kevin and I discussed this, and we are of the opinion that we should do the following: since the Board has in the past elected to protect NSA employee names, we know what their intent is in cases like this. We should just make a "technical correction" to the Fed Reg notice, and protect the NSA names. We are going to run this by the Man before we do it, but that's our call.

**Subject:** NSA  
Dave Hiestand called me this AM. In preparing documents for NARA, NSA has discovered that it failed to request to redact the names of NSA employees on three documents (10053, 10057, and 10155). They want to know what to do. Would you please take a look at these documents and see what the problem is? (For 10053 and 10057 he made it sound on the phone like it's a minor matter of names appearing in the header/footer that they neglected to highlight in copy submitted for Board Review; for 10155, it is apparently a memo that they would like to blot out the signatories.) Discuss with Kevin and advise me as to what we should recommend. (You will probably wind up honchoing whatever fix is appropriate, if any, since I won't be here. . .)
