Subject: Re: NSC Records

Please discuss this with me. To: Jeremy Gunn/ARRBcc: Manuel Legaspi/ARRB, Michelle Combs/ARRB
From: Bob Skwirot/ARRB Date: 06/20/97 05:49:19 PM Subject: NSC Records
NSC has completed the first phase of their work on the records we identified last month. Today, Dave Van Tassel left us a printout of those records as they have been entered in their database. Entering them into their system has helped NSC identify records which have been released in full in other contexts. Dave also gave us copies of the release in full records. (Remember that we agreed to generate record identification forms for the open in full documents.) Then next phase of this project is, I believe, ours. Dave has identified records on the printout that he thinks have been reviewed already as part of other agency or congressional committee records. He asks that we search our database to determine if they have been reviewed under our act. I searched a sample- seven or eight records- and found four that appear to be matches. This seems to be a productive exercise, even though it can be time consuming. In the long run it will save time for the NSC and for us if we can identify records that were previously reviewed and thus eliminate a fair percentage of the records we identified from having to go through the entire review process. Some statistics: 289 records, 890 pages, 42 of these open in full. I will continue these searches and enlist the help of others who were involved in our survey unless you think that this is not a useful exercise. Thanks.
