Subject: Re: November Congressional Letter

The Board acted on 229 CIA related records at the November 17, 1997 meeting. Of these 168 are CIA records and 63 are HSCA. (I must note that an issue which the Board voted to release is still of concern to the Agency, so 15 records from this group may be impacted if an appeal or reconsideration is undertaken.) The CIA records are from a broad band of the Sequestered Collection- Boxes 8 through 59. The HSCA records are also from throughout the Sequestered Collection- from boxes 13 through 63. We also noticed 290 consent releases at this meeting. They are from the Sequestered Collection, from Boxes 5 through 37. Putting the numbers in perspective, we are getting close to finishing review of the HSCA Sequestered Collection material, though it may be too soon to announce that, especially since there is a fairly large number of records that have been tagged for consent release but still need to be processed. They should be taken care of in the upcoming months. Our review of the CIA Sequestered Collection is moving along. I think that we are approaching completion of the folders that were marked for priority review. When that is done there will still be approximately 40% of the Sequestered Collection to be handled in the future months. We also noticed 108 NARA/ Warren Commission Consent Release documents with this meeting. They may be of some use to you, since this is a body of records outside of the usual CIA or HSCA collections. If you need more information, please contact me. I'll be back on Monday. If you need something on Friday, you can ask Ben or Pete. They will be here. Thanks.
