**Subject:** Re: NSA count

Manuel - I know we did the count listed below, but is there anything further to be done on this project? Pls let me know if i can help! CathyTo: Cathy Rodriguez/ARRBcc: From: Manuel Legaspi/ARRB Date: 12/12/97 10:13:26 AMSubject: NSA countJust let me know when you would like to attack this task... What I am basically trying to do is take an inventory of all NSA docs that we have in the safe. Right now the list of RIF #s we have does not match up with the prelim inventory I have performed. So, essentially, the task will be for one of us to pull each document out of the safe, call out the RIF #, while the other person checks it off the number list. It is boring but at this stage I think it has to be done. I don't expect that it will take more than half an hour.Thanks, ML
