Subject: Re: Federal Register Typesetting Codes -Reply
Sorry it took so long for me to get back to you, but I was on vacation. The attachment did not come through, so I would appreciate it if you could resend it sometime.Thanks...To:Peter_Voth @ jfk-arrb.govcc:cc:

03:18:43 PMSubject:Federal Register Typesetting Codes -ReplyPeter,Attached ARRB.ZIP contains typesetting files for FR documetns thatappeared on December 4, 1997, at page 64195 December 24, 1997, at page 67332 January 15, 1998 , at page 2361These are text files, you should be able to open then up with just aboutanything. Special characters include ascii 007, which precedes capital "I"to signal 2 numeric bytes typesetting information, capitsl "S" or "F" to signal4 numeric bytes of format / parameter information, or capital "Q" to signaltwo numeric bytes vertical space in points.There are also a few other special characters for different types ofhyphens, dashes, and spaces. However when sending a coded documentI wouldn't worry too much about these: just use what's on the standardkeyboard.For notices such as yours you could set up a template that contains thesecodes.If you feel you want to explore this further, contact me by replying here orphone 202 523-3447Ernie SowadaNational Archives and Records AdministrationOffice of the Federal
