Subject: Re: more urgent requests!

Put the passport stuff on your desk, did not see any visa stuff, but have installed adobe acrobat on my computer so if you find any you can have pete print it out from my machine. Laptop: Defragmented the hard drive so that might help, machine ran fine. I would say it must be the port replicator so we might want to plug the montior directly into the back of the machine. You can also plug in the mouse and use the keyboard of the laptop. I left the pcanywhere disks at my house so will need to bring those in, I could bring them to your house over the weekend, Beth and I are hoping to go the the Renisance (sp?) festiville on Saturday so I could come by and install them. Can you give me a call Friday so we can discuss. 703-469-2597 or 301-779-8380 after
