DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE PUBLIC HEALTH SERVICE

17 March 1953

National Institute of Mental Health Addiction Research Center
U.S. Public Health Service Hospital Lexington, Kentucky

> I have worked the dose of C-5 up to 100 mg./70 kg. of body weight without obtaining any appreciable subjective mental effects, or any objective changes in behavior. Cardiovascular effects of the degree seen with C-9 also have not been apparent. The material has been given in alcoholic solution by mouth.

It appears to me that this is a relatively inert drug. Do you wish me to take the dose any higher, or to discontinue study of it?

I have to be in Washington from March 27th through April 3rd and will have some free time on Monday, March 31st and on Tuesday April 1st. I could come down for a visit if you so desire. I will give you a call while in Washington.

Sincerely yours

Harris Isbell, M. D.

Director
