Questions for USAMRIID Interviews

[redacted] was asked all of the questions titled "Questions for USAMRIID Interviews" even though [redacted] advised [redacted] never worked with any biological organisms. A copy of said questions is stored in the 1-A section of case file for this report of interview, as notations were made by the interviewing Agent on same. Specific responses for numbered questions are as follows:

1. [redacted]

2-4. [redacted] responded "No" to each.

5-9. [redacted]

[redacted] is not familiar with the names Bruce Ivins or [redacted] never was associated with anyone who was versed in the weaponization of any agents. [redacted] also was never aware of any contamination in [redacted] and was not familiar with the term [redacted]

In June or July 2001, [REDACTED] returned to [REDACTED] where [REDACTED] is currently employed as [REDACTED].

While employed at USAMRIID, [REDACTED] did not have access or work with bacillus anthracis (Ba). [REDACTED] had access to Ebola, Marburg and VEEV but did not work with the live agents except for work related to [REDACTED]. [REDACTED] did the Ebola challenges in which [REDACTED]. [REDACTED] did not have access to the Ba lab and any anthrax work was performed by other individuals. BRUCE IVINS worked in the anthrax area.

[REDACTED] had not ever used the modified G sporulation media. [REDACTED] had not used any culture technique.

[REDACTED] was one of the last bio warfare guys that had an expertise in weaponization techniques. [REDACTED]

[REDACTED] had no knowledge of any areas of USAMRIID which had problems with bacterial contamination, particularly virology suites.

Besides the [REDACTED] Building, [REDACTED] worked in [REDACTED] suite and [REDACTED] suite in building [REDACTED]. [REDACTED] could not remember what the specific room numbers for [REDACTED] and [REDACTED] suites were. [REDACTED] suite was where Ebola work was performed and [REDACTED] suite was where VEEV work was performed.

b6
b7C

[REDACTED] had not used the hot areas of building [REDACTED]. [REDACTED] could not remember if [REDACTED] had used the room [REDACTED], the walk-in cooler, in building [REDACTED]. [REDACTED] had no knowledge of who used or what was stored in room [REDACTED].

[REDACTED] had never seen or heard of people "piggy-backing" in and out of the hot areas at USAMRIID or visiting scientists being taken into the hot areas by USAMRIID researchers.

b6
b7C

[REDACTED] had no knowledge of anyone removing Select Agents from the hot areas covertly but believed that it would be easy because anyone that had the appropriate access badge and pin code could walk into a hot area and conceivably take anything.

[REDACTED] was not aware of anyone who said they might make a Select Agent for use in some improper fashion. [REDACTED] was not

aware of any persons with the access and ability to create or handle dangerous biological agents who had expressed hostile attitudes toward any political organization, the media, or others. There were no persons that [REDACTED] believed or suspected of possibly being associated with the mailing of the anthrax letters. There were no people that [REDACTED] worked with who were lackadaisical in handling dangerous items or inappropriately interested in agents that could be turned into harmful agents. [REDACTED] was not aware of anyone at USAMRIID that was rumored to be interested in gaining access to anthrax or any other biological or chemical agents or the means to produce them without a specific means to do so. [REDACTED] was not aware of any work being conducted with Ba or its simulants which was unofficial or not recorded. [REDACTED] was not aware of anyone who expressed a special interest in being able to get around forensic techniques.

b6

The dried BA would have to be ground up prior to being placed in the mail. The problem with grinding up the dried BA is that chemicals have to be added in order to keep the dried BA from sticking together and in order to get the dried BA into powder form. [REDACTED] did not know what chemicals had to be used. [REDACTED] had knowledge of the process to dry out and process the BA from his work as a [REDACTED]. Someone with [REDACTED] knowledge might have the knowledge of what chemicals had to be used when the dried BA was ground up. [REDACTED] did not believe that there were many people with the knowledge of the exact chemicals to be used.

[REDACTED] nor any of [REDACTED] associates had any personal or professional association with Trenton, New Jersey, Princeton, or other areas of New Jersey. [REDACTED] nor any of [REDACTED] associates traveled to New Jersey in September or October 2001. [REDACTED] had relocated to [REDACTED] time frame and was [REDACTED].

There were Standard Operating Procedures for decontamination of Class II and Class III biosafety cabinets in [REDACTED] work areas but [REDACTED] could not remember any of the specifics. Paraformaldehyde and glutaraldehyde fumigation were not employed in the building in which [REDACTED] worked but they were used in Building [REDACTED] on a regular basis. [REDACTED] had never smelled bacterial decontamination agents in the [REDACTED] because [REDACTED] was [REDACTED].

Everybody used the plastic storage containers, such as sterilite boxes, for storage of their materials at USMARIID. The storage containers were everywhere. [REDACTED] was not sure how, when, where, or by whom the containers were purchased. Since the containers were everywhere, [REDACTED] had never noticed any of the storage boxes missing because it would have been hard to determine.

b6

All of [REDACTED] work was recorded in lab notebooks. [REDACTED] was not sure where they would be stored but [REDACTED] at the [REDACTED] building would probably know where the notebooks were stored.

[REDACTED] had never purchased pre-stamped envelopes like the ones used in the mailing for [REDACTED] own use or for anyone else. [REDACTED] had never used any of the vending machines in Frederick, Maryland to purchase pre-stamped envelopes.

[REDACTED] had not personally handled any of the anthrax laced letters or envelopes. [REDACTED] had not performed any analytical work of the evidence in the case.

[REDACTED] never hosted any foreign visiting scientists and was not an [REDACTED] member.

[REDACTED] was employed by [REDACTED] and no longer working for USAMRIID. [REDACTED] was not sure if [REDACTED] had an escort, what type of badge [REDACTED] had, and where else [REDACTED] might have gone in USAMRIID.

[REDACTED] never saw [REDACTED] working with bacterial cultures or lyophilizers. [REDACTED] had no knowledge of [REDACTED] removing or borrowing any equipment from USAMRIID or trying to obtain discarded lab equipment. [REDACTED] never asked [REDACTED] for any isolates, equipment, or access to any USAMRIID locations. [REDACTED] did not know where [REDACTED] stored samples or materials nor was [REDACTED] aware of any samples [REDACTED] might have brought with [REDACTED] from prior research or employment.

[REDACTED] The following investigative steps were conducted by Postal Inspector [REDACTED]
[REDACTED] on approximately April 5, 2005, or otherwise indicated by the dates below:

The Warren County, Ohio Genealogical Society was contacted with regard to ordering obituaries from their records. On April 5, 2005, seven obituaries were ordered using an order form and USPS money order sent through the U.S. Mail, for the following names: C. WILBUR IVINS (died 1938), MARY RANDALL IVINS (died 1954), MABEL ANN IVINS (died 1970), RANDALL IVINS (died 1985), T. RANDALL IVIN (died 1985), GLADYS HAZEL (GUM) IVINS (died 1996), and CLAYTON BLAKE IVINS (died 1998).

Copies of the abovementioned obituaries were received via the U.S. Mail on April 13, 2005. One obituary mentioned BRUCE IVINS: T. RANDALL IVINS died in 1985 and was survived by son Bruce of Frederick, Maryland. Obituary of C. WILBUR IVINS indicated that he was survived by son [REDACTED] and widow MARY IVINS. Obituary of MARY IVINS indicated that she was survived by son [REDACTED]

Attached hereto and considered part of this document are the original order form, a copy of the USPS money order receipt, and the receipt form, obituaries and a copy of the envelope received on April 13, 2005.

ILLNESS IS FATAL TO SAUL HURWICH

Associated With Fashion
Shoppe Many Years;
Rites Tuesday

Following an illness of several months, Saul Hurwich, aged 60, died Sunday at Jewish Hospital in Cincinnati where he had been a patient for several weeks.

He had been associated with his wife Ruby in The Fashion Shoppe here for more than 35 years. A graduate of University of Pittsburgh, he was an attorney and practiced law for a time in Pittsburgh. Hutslar, Esther
27 May 1954

LOUISIANA WOMAN IS COUNTY'S SIXTH TRAFFIC VICTIM

Killed Beneath Own Car
In Mason Wednesday
Night

The death of the year was recorded Wednesday night when a 56-year-old New Orleans woman was killed underneath her own car in the village of Mason.

Police Chief Elmer Wright, who investigated, reported Mrs. Esther Hutslar was en route to Springfield to visit a nephew. She became tired of driving and asked her companion, Mrs. Gertrude Haase, 52, New Orleans to relieve her. They stopped near the Gallimore Funeral Home. By mistake, Mrs. Hutslar left the car in automatic drive. As she walked in front of the machine her companion stepped on the foot acc-

Warren county's sixth traffic victim. Hutslar down and ran over her. In her excitement, Mrs. Haase put the car in reverse and the car passed over her again. Rushed to Mercy Hospital in Hamilton, she was reported dead on arrival.

The body was removed to Littleton Funeral Home in Springfield. Her nephew is Luther Doughman assistant police chief of that city.
