_____ role in _____ afforded
_____ access to _____
_____ never went into the _____ labs. _____ was located in
Rooms _____ of Building _____. Other USAMRIID
employees using this office space included _____
_____ was the _____ predecessor
as _____ is the current _____ Room _____ contained
desks, file cabinets and a freezer. The freezer was used to
temporarily store materials prior to and after irradiation. This
freezer was not locked. The door to _____ had a key lock. _____

_____ Room _____
contained Beta and Gamma radiation counters, a chemical fume hood
and a radiation calibrating instrument. Room _____ was _____
_____. _____ circled and initialed the locations of
these rooms on a floor plan that has been included in the attached
1A envelope.

_____ had access to Room _____ in Building _____. A
walk-in freezer/cooler is located within the room. No radioactive
material is stored there. Anyone can walk into the room. _____
avoided walking into labs where people were working.

_____ involving infectious or non-infectious biological
material. Within three days of beginning employment _____ was given
samples containing Ebola virus _____. Samples containing
infectious matter originating at USAMRIID were _____

_____ received shipments of infectious material from sources outside of
USAMRIID for irradiation at the shipping and receiving area of
Building _____. _____ received from the _____
_____ various infectious
materials _____. The material was received dry
and wet and presented within varying types of containers. _____ never
opened the containers. _____ to the
material was _____ viable material in
the sample. _____

_____ received various strains of anthrax _____
_____ Bacillus anthracis (Ba) for BRUCE IVINS
and _____ does not recall handling _____ Ba.

b6

be used for funding schools, housing or education. [] recalled that it was a female member of the group. [] does not recall the name of any of the [] of the tour. [] feels that it is important to fund researchers full time than rely on temporary contractors.

The news has reported that the anthrax in the mail came from USAMRIID. It would not have been hard to remove anthrax from USAMRIID. Biological agents may be removed from the hot areas by secreting them on your person and walking through the shower area without showering. Showering was not an OSHA requirement but was a USAMRIID requirement that [] was aware was not followed. Someone who has taken infectious material takes a chance of killing themselves. [] could not identify anyone that [] would suspect taking biological agents from USAMRIID. [] could not identify anyone, other than [] that would be considered by others to be a disgruntled employee of USAMRIID. [] is not aware of anyone who participated in unofficial work with Ba or its simulants. [] is not aware of anyone who "piggy-backed" into and out of the hot areas of USAMRIID.

[] recalled two incidents involving lax handling of dangerous items at USAMRIID. [] recalled two incidents involving unknown persons that occurred around [] In one incident [] observed loose vials under locked freezers in the hallway near the [] suite of rooms. [] also recalled an incident involving vials that apparently fell into a freezer used to obtain dry ice. [] was not aware of any areas in USAMRIID that had problems with bacterial contamination. [] heard that there had been one after [] left USAMRIID involving a pass through associated with a hot suite.

[] does not know how to prepare anthrax for mailing. [] does not know what a lyophilizer is. [] does not have experience in forensic techniques. [] does not recall anyone who expressed a special interest in forensic techniques. [] recalled that the [] at USAMRIID has participated in forensic analysis. [] mentioned that they were involved in examining ricin bullets. [] does not have any personal or professional association with New Jersey and did not travel there in September or October of 2001.

[] described that the standard SOP for decontamination of Class II and Class III biosafety cabinets involved paraformaldehyde

Continuation of FD-302 of [REDACTED]

, On 11/24/2003 , Page 2

[REDACTED] characterized [REDACTED] position at USAMRIID as [REDACTED] and although primarily assigned to the [REDACTED] [REDACTED] he [REDACTED] was also assigned [REDACTED] [REDACTED]

[REDACTED] stated that [REDACTED] never worked with any form of anthrax while at USAMRIID and only worked in a [REDACTED] [REDACTED] suite a few times, always accompanied by [REDACTED] [REDACTED] remembers being issued a key card for access into the [REDACTED] suite at USAMRIID.

SA [REDACTED] then asked [REDACTED] the relevant questions provided by WFO for interview purposes.

If never interviewed:

1. Obtain details on education, specializations, nature of work at each laboratory of employment; details on work with biological organisms (particularly *Bacillus anthracis* (Ba)).

Answer: Covered above

2. Determine whether any work with Ba was on the living organism or only with components such as toxin, DNA, etc.

Answer: [REDACTED] has never worked with any form of anthrax

3. Obtain details on all projects involving Ba including identification of contracts, subcontractors, lab assistants, whether the work involved spores or just vegetative cells, strains used, specifically how the Ba was grown, storage technique and all storage locations, distribution to any other researchers.

Answer: [REDACTED] has never worked with any form of anthrax

4. Have you ever used the modified G sporulation media? When, on what organism and strain, where was it stored?

Answer: [REDACTED] has never worked with any form of anthrax or anthrax created using the modified G sporulation media

279A-WF-222936-302

b6
b7C

Continuation of FD-302 of

[Redacted]

, On 11/24/2003

, Page 3

5. What type of culture technique did you use? Was it single colony or multiple colony culture technique? If you used both, what time-frames did you use each?

Answer: [Redacted] has never worked with any form of anthrax

6. Identify any work involving the drying of Ba. Was a lyophilizer used? What was the specific technique? Are any samples of dried Ba still maintained? Were high resolution images collected?

Answer: [Redacted] has used a lyophilizer in the past on various projects involving plague but never anthrax

7. Were the strains used fully characterized? Where did they originate, and where have they been disseminated? If the strain was Ames, did it come from Bruce Ivins or [Redacted]

Answer: [Redacted] has never worked with any form of anthrax

8. Identify any persons who have expertise in weaponization techniques, spore production, lyophilizing. Is there anyone else we should talk to about the above issues?

Answer: [Redacted] does not know of any individuals with the above listed expertise

9. Identify any areas of USAMRIID which had problems with bacterial contamination, particularly virology suites.

Answer: [Redacted] never heard about any issues of bacterial cross contamination.

10. Identify the areas routinely used by the employee (use floor plans).

Answer: [Redacted]
[Redacted]
[Redacted]
[Redacted] was unable to specifically identify [Redacted] lab on the blueprints provided by WFO.

11. Determine if the person used the hot areas of building [Redacted] Was the walk-in cooler, room [Redacted] used? Who was

b6
b7C

279A-WF-222936-302

Continuation of FD-302 of

, On 11/24/2003, Page 4

observed using the walk-in cooler? Do you know what was stored there?

Answer: stated that conducted while at USAMRIID (approximately times total) was done in the laboratory building, never in building

12. Did people "piggy-back" in and out of the hot areas at USAMRIID? Were visiting scientists taken into the hot areas by USAMRIID researchers?

Answer: stated that cannot remember ever witnessing anyone "piggybacking" into the area at USAMRIID.

13. How could someone remove Select Agents from the hot areas covertly? Identify any individuals who attempted this.

Answer: believes that it would be "pretty easy" to remove select agents from the suites at USAMRIID. stated that someone could conceal an agar plate or a small vial under in the armpit area long enough to get through the "shower-in/shower-out" process covertly. does not know of any individuals who ever attempted to remove select agents from a lab.

14. Are you aware of anyone who said they might make a Select Agent for use in some improper fashion?

Answer: No

15. Are you aware of any persons with the access and ability to create or handle dangerous biological agents who expressed hostile attitudes toward any political organization, the media, or others?

Answer: No

16. Are there any persons you believe to be or suspect of possibly being associated with the mailings of the anthrax letters? Who and why?

Answer: No

279A-WF-222936-302

b6
b7CContinuation of FD-302 of

, On 11/24/2003 , Page 5

17. Are there any people with whom you have worked who were lax in handling dangerous items or inappropriately interested in agents that could be turned into harmful agents?

Answer: No

18. Was there anyone at USAMRIID who was rumored to be interested in gaining access to anthrax or any other biological or chemical agents or the means to produce them without a specific need or responsibility to do so?

Answer: No

19. How would you go about preparing dried Ba and sending it through the mail?

Answer: believes that it would be pretty tough to prepare dried Ba and put it in the mail. does not know how someone would find out what powder to link to the Ba spores to induce aerosolization. does not believe that simply opening an envelope would be enough energy to disperse the dried anthrax. believes that you would need to pressurize the envelope in some manner to ensure proper dispersal.

20. Are you aware of anyone who expressed a special interest in being able to get around forensic techniques?

Answer: No

21. Do you or any of your associates have any personal or professional association with Trenton, New Jersey, Princeton or other areas of New Jersey?

Answer: No

22. Did you or any of your associates travel to New Jersey in September or October 2001? Do you recall where you were during that time period?

Answer: does not believe has ever been in New Jersey and believes was in during the specified time frame.

279A-WF-222936-302

b6
b7CContinuation of FD-302 of

, On 11/24/2003 , Page 6

23. Are there SOPs for decontamination of Class II and Class III biosafety cabinets in your work areas? What are they?

Answer: does not know if USAMRIID has any SOPs for the decontamination of Class II and Class III biosafety cabinets.

24. Has paraformaldehyde or glutaraldehyde fumigation been employed in the virology areas? When?

Answer: has no knowledge of this process.

25. Have you ever smelled bacterial decontamination agents in the virology suites?

Answer: No

26. Have you ever used plastic storage containers, such as sterilite boxes, for storage of your materials at USAMRIID? If so, how, where and when were they purchased? By whom? Did you ever notice any such storage boxes missing?

Answer: No

27. Are you aware of any work being conducted with Ba or its simulants which was unofficial or not recorded?

Answer: No

28. Was all of your work recorded in lab notebooks? Where are they stored?

Answer: stated that all of work was recorded in a lab book and would assume the lab book is in possession.

29. Did you ever purchase pre-stamped envelopes like the ones used in the mailings for your own use or for anyone else? If so, did you ever give them to anyone else? Where were the envelopes stored?

Answer: No

b6
b7C

279A-WF-222936-302

Continuation of FD-302 of [REDACTED]

, On 11/24/2003 , Page 7

30. Did you ever use any of the vending machines in Frederick to purchase pre-stamped envelopes? If so, which machine and when?

Answer: No

31. Did you personally handle any of the anthrax-laced letters or envelopes? If so, when, what rooms, who else was present?

Answer: No

32. Did you do any analytical work on the evidence in this case? Get details.

Answer: No

Questions regarding [REDACTED]

[REDACTED] did not recognize [REDACTED] name as anyone [REDACTED] remembers from [REDACTED] at USAMRIID during [REDACTED] SA [REDACTED] showed [REDACTED] a color photograph of [REDACTED] in an attempt to jog [REDACTED] memory. After viewing the photograph for several seconds, [REDACTED] stated that [REDACTED] has never met [REDACTED] and does not believe [REDACTED] ever saw [REDACTED] at USAMRIID. Therefore all of the [REDACTED] associated questions, other than the one listed below, were not asked of [REDACTED]

26. Is there anything we have not asked you that you could tell us which could be related to the anthrax letter mailings?

Answer: No

If interviewee hosted foreign visiting scientists:

[REDACTED] stated that [REDACTED] never hosted a foreign visiting scientist while working at USAMRIID during [REDACTED] Therefore the listed questions were not asked of [REDACTED]

If interviewee was [REDACTED] member:

USAMRIID Facility Key Card Access records documented that [redacted] entered Building [redacted] on 9/17/01 at [redacted] and remained at work until [redacted] exit at [redacted]. The longest period between key card activity during work hours for which [redacted] was unaccounted on 9/17/01 was approximately [redacted] hours and [redacted] minutes.

After exiting USAMRIID on 9/17/01, [redacted] is unaccounted for during a period of [redacted] hours and [redacted] minutes until [redacted] badged in again on 9/18/01 at [redacted]. [redacted] exited Building [redacted] on 9/18/01 at [redacted]. The longest period between key card activity during work hours for which [redacted] is unaccounted for on 9/18/01 was approximately [redacted] hours and [redacted] minutes.

A review of telephone toll records showed a telephone call to [redacted] on 9/17/01 at 7:06 PM.

A review of [redacted] credit card transactions and [redacted] Bank Records indicated no purchases during this time frame.

Time-line Second Mailing (3:00 p.m., 10/06/01 through 11:00 a.m., 10/09/01)

USAMRIID Facility Key Card Access records documented that [redacted] entered Building [redacted] on 10/6/01 at [redacted] and remained at work until [redacted]. On the same day, [redacted] telephone toll records documented a call from [redacted] residence to [redacted] at [redacted]. [redacted] credit card records documented a purchase at [redacted] in [redacted] on 10/6/01.

USAMRIID Key Card Access records documented that [redacted] first entered USAMRIID on 10/7/01 at [redacted]. [redacted] remained at work on 10/7/01 until [redacted]. There were approximately 20 hours and 36 minutes for which [redacted] was unaccounted between 10/6/01 at [redacted] PM and 10/7/01 at [redacted].

[redacted] telephone toll records documented the following calls from [redacted] residence on 10/7/01:

Telephone call to [redacted] at 11:52 AM;
Telephone call to [redacted] at 11:53 AM.

[redacted] credit card records documented a purchase on 10/7/01 at the [redacted] in [redacted].

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 12/2/2003

b6
b7C

USAMRIID Key Card Access records documented [redacted] entering USAMRIID on 10/8/01 at [redacted] [redacted] is unaccounted for during a period of approximately 18 hours and 16 minutes from 10/17/01 at [redacted] to 10/8/01 at [redacted] [redacted] remained at USAMRIID on 10/8/01 until [redacted]. The longest period between key card activities on 10/8/01 was approximately 2 hours and 5 minutes.

[redacted] is again unaccounted for during a period of approximately 10 hours and 45 minutes from 10/8/01 at [redacted] PM until [redacted] is recorded entering USMARIID on 10/9/01 at [redacted] where [redacted] remained until [redacted]. During work hours on 10/9/03, the longest period of time between key card activity was approximately 3 hours and 52 minutes.

Additional Information:

[redacted] has been interviewed on at least [redacted] occasions concerning this investigation and has been cooperative and forthcoming with investigators.

On [redacted] voluntarily submitted to a polygraph examination concerning the anthrax mailings. The result of the examination was not indicative of deception.

In addition to the findings presented above and the fact that [redacted] has cooperated with this investigation, no direct, testimonial or circumstantial evidence has been discovered to date which suggests that [redacted] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [redacted] is intended in this case.

279A-WF-222936-LEAD

Continuation of FD-302 of [REDACTED]

, On 11/24/2003 , Page 3

[REDACTED] has studied "Unclassified" literature on the drying of Ba. According to [REDACTED] the procedures for processing and weaponizing Ba are classified. [REDACTED] knows that Ba spores need to be between 2 to 5 microns, in order for them to be able to be inhaled and remain in the pulmonary system. [REDACTED] also knows that the spores need to be charged so that they repel each other. This charge allows the spores to remain aerosolized.

To the best of [REDACTED] knowledge, dried Ba is still maintained at USAMRIID. [REDACTED] has read about the testing of primates at USAMRIID. This testing would have to involve Ba that is maintained at USAMRIID. Based upon [REDACTED] readings, Ba originally came from the USDA, around 1950. The Ames strain is the main strain of Ba. This strain was eventually applied to the weapons program. As far as [REDACTED] knows, each strain can be traced back to its origin. [REDACTED] has no knowledge of USAMRIID ever farming/disseminating strains. [REDACTED] does not know BRUCE IVINS, or [REDACTED]

[REDACTED] are the individuals that [REDACTED] knows to be experts in weaponizing Ba. [REDACTED] who spoke at various USAMRIID courses, also spoke at the USAMRIID Medical Management of Chemical/Biological Casualties Course. After talking down about USAMRIID, [REDACTED] was never invited back. [REDACTED]

[REDACTED] has an article that pertains to the first meeting between [REDACTED]. The article talks about the weather and "what a great time to release whatever." The article does not talk about the manufacturing process, just the optimal time to release certain agents. This is an article that was authored by [REDACTED] near the end of the United States offensive biological program.

[REDACTED] worked on the "offensive" side of the weaponization program. USAMRIID is part of the "defensive" side of the weaponization program. USAMRIID also works with Aberdeen Proving Ground, for the design and production of Chemical/Biological masks.

During [REDACTED] time at USAMRIID, [REDACTED] recalls one instance where there was an accidental release of Ba. This release coincided with the visit of a Senator from New Orleans. The Senator was touring USAMRIID at the time of the release. [REDACTED]

b6 279A-WF-222936-LEAD
b7C

Continuation of FD-302 of [REDACTED]

, On 11/24/2003, Page 4

[REDACTED]
[REDACTED]
[REDACTED] is not sure of the date/time period of this release. The Ba release happened inside the "hot area." To the best of [REDACTED] knowledge, [REDACTED] remembers [REDACTED]

[REDACTED]
[REDACTED] was provided with a set of floor plans for USAMRIID. The rooms marked with an "X" are areas that [REDACTED] has worked in.

[REDACTED]
The first time was for a tour, and the second time was during the accidental Ba release. According to [REDACTED] the cooler, room [REDACTED] is still being used. [REDACTED] as well as [REDACTED] [REDACTED] have all been in the cooler at one time or another. [REDACTED] [REDACTED] along with various enlisted personnel.

"Piggy Backing" in the "hot area" did not occur. Having said that, there was a problem with all of the other entrances. The problem involved instances where several employees would enter the facility, after only one person was granted access. To gain access to the "hot area," one must be wearing the "blue chemical suit." Visiting scientists, as well as visitors, by protocol, must have all of their vaccines prior to entering the "hot area." Even though it is unlikely, it is possible for a visitor to gain access to the "hot area."

[REDACTED] between 1996 and 1999, CID investigated a matter where USAMRIID soldiers manufactured illicit drugs. These soldiers used a "hot suite" as their laboratory. [REDACTED] is not sure how they got their drugs out of the "hot area." [REDACTED] stated, "If they can get their drugs out of there, that may be something that you want to look into." [REDACTED] also said, "I am sure that someone can sneak something out if they want to." [REDACTED] does not recall seeing any sensors, nor any security measures, in place to detect the removal of biological/chemical agents from USAMRIID. No one was ever "frisked" while entering or leaving USAMRIID.

[REDACTED] is not aware of anyone who expressed a desire to make a Select Agent for use in an improper fashion; nor is [REDACTED] aware of anyone with access and ability, who expressed hostile attitudes toward any political organization, the media, or others.

b6
b7C

279A-WF-222936-LEAD

Continuation of FD-302 of [REDACTED]

, On 11/24/2003, Page 5

[REDACTED] does not suspect anyone to be the culprit of mailing the Anthrax letters.

Pre-September 11, 2001, [REDACTED] recalls an incident where a foreign scientist, from New York, took a vial of Venezuelan Equine Encephalitis. This scientist took the vial to New York, after being administered the vaccine. [REDACTED] believes that this scientist was from a Middle Eastern country. CID tracked the scientist down and recovered the vial. This scientist no longer has access to USAMRIID. [REDACTED] advised that the FBI investigated this matter as well.

[REDACTED] traveled to [REDACTED] to attend the [REDACTED]. This is a [REDACTED]

b6
b7C
b2
b7F

[REDACTED] There were no SOP's for decontamination within the [REDACTED] of USAMRIID. Paraformaldehyde is used to defumigate the rooms within [REDACTED] areas. [REDACTED] and was removed from the [REDACTED] area. This procedure was never needed while [REDACTED] was at USAMRIID.

Date of transcription 12/12/2003

[redacted] date of birth [redacted] Social Security Number [redacted] was interviewed by Special Agents [redacted] and [redacted] at [redacted] place of employment at the U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID), Ft Detrick, Maryland. After being advised of the identities of the interviewing Agents and the nature of the interview, [redacted] voluntarily provided the following information:

P
12/12

[redacted] current position is a [redacted] [redacted] duties are to [redacted]
[redacted]

[redacted] have access to *Bacillus anthracis* (B.a.). [redacted] use both agar and broth to grow B.a. Tryptic Soy Agar (TSA) is used most often as the agar growth medium, and sometimes New Sporulation Media (NSM) is also used, but not very often. [redacted] was unsure whether Modified G media is used. [redacted] believes that [redacted] would have laboratory notebooks that would answer that question. Both single colony and multiple colony culturing techniques have been used depending on the type of experiments. [redacted] guesses that for the culturing of the Ames strain, multiple colony culturing was utilized.

[redacted] first worked with B.a. during [redacted] [redacted] During the first Gulf War in the 1990's, work with the Ames strain of B.a. increased as it was used as the test strain in the laboratory. [redacted] has worked with, and continues to work with, live B.a. spores, but [redacted] has never produced a powdered form of anthrax. [redacted] believes that it would not be difficult to produce powdered B.a. One would simply culture it and dry it using a lyophilizer, and then mill it until it turns into a powder. [redacted] has traced the geneology of the Ames strain that [redacted] has [redacted] back to BRUCE IVINS.

Investigation on 12/12/2003 at Frederick, Maryland

Continuation of FD-302 of

[REDACTED], On 12/12/2003, Page 2

During [REDACTED] was often in the "hot" suites in Building [REDACTED]. In recent years, [REDACTED] has not been in the "hot" suites very much. The B.a. used in [REDACTED] laboratory is stored in the [REDACTED] suite. [REDACTED] has never used plastic sterilite containers in USAMRIID. The research conducted by [REDACTED] was recorded in notebooks which are either stored in [REDACTED] or USAMRIID's library.

[REDACTED] believes that it would be very easy for anybody with access to the "hot" suites to obtain samples of anthrax or other kinds of agents. Anyone with the intent to steal it would only need to put a few spores under the fingernails, on the earlobe, or any other part of the body. Even if USAMRIID conducted security checks on people leaving the building, the spores would never be detected. As long as there are no open wounds in the area of the body that the spores are stored, the perpetrator would not be adversely affected.

[REDACTED] numerous foreign visiting scientists through the years. Records of these visits are kept at the front office of USAMRIID. [REDACTED] recalls that [REDACTED] was a foreign visitor from [REDACTED] who had access to the "hot" suites without the need for an escort. [REDACTED] perused through [REDACTED] folder which was kept in [REDACTED] filing cabinet, and told the Agents that [REDACTED] was at USAMRIID in [REDACTED] for approximately [REDACTED] or slightly more than [REDACTED]. [REDACTED] worked on [REDACTED] and seeing the differences between [REDACTED] [REDACTED]

[REDACTED] [REDACTED] did express an interest in obtaining the Ames strain and a [REDACTED]. [REDACTED] However, the agreement was never finalized and [REDACTED] [REDACTED] is currently in the [REDACTED]. [REDACTED]

Another foreign visiting scientist who did not require an escort was [REDACTED] (last name unknown: LNU). [REDACTED] does not believe that [REDACTED] LNU was in the hot suites. [REDACTED] does not recall any other scientist who showed a special interest in the Ames strain. [REDACTED] has never noticed anybody in the laboratory or the "hot" suites that didn't belong or that might have aroused [REDACTED] suspicions.

Title: AMERITHRAX;
MAJOR CASE 184

Synopsis: Report results of elimination investigation to date
regarding [redacted] date of birth [redacted]
social security account number [redacted]

b6
b7C

Details: [redacted] began employment with the United States Army
Medical Research Institute of Infectious Diseases (USAMRIID) in

[redacted] was investigated in captioned investigation
based upon [redacted] work with virulent Bacillus anthracis (Ba) in
spore form and [redacted] access to the Ames strain of Ba. [redacted]

[redacted] work focused on [redacted]

[redacted] has not traveled to New Jersey and does not
have any family or friends in the Princeton or Trenton, New
Jersey area. [redacted] who resides in
New Jersey.

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 08/12/2003

b6
b7C

Reviews of [redacted] financial records from 1999 thru 2001 revealed no connections to New Jersey.

A time line of [redacted] activities for the likely time periods of the mailing of the anthrax letters from Princeton, New Jersey was compiled using USAMRIID security key card access records, home telephone toll records, credit card use, and personal bank account records (via cleared checks provided) and Fort Detrick motor-pool vehicle records. The time-line focused on any applicable six hour period for which [redacted] would be unaccounted, with the premise that it takes approximately six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

Time-line First Mailing (5:00 p.m., 9/17/2001 through 8:00 p.m., 9/18/2001)

b6
b7C

A review of [redacted] USAMRIID key card access activity displays thirty (30) recorded accesses to building [redacted] on 9/17/2001; the first entry "IN" at [redacted] and the final exit "OUT" at [redacted]

b6
b7C

A personal check from a [redacted] account of [redacted] and [redacted] for "Cash", was negotiated at [redacted] bank, [redacted]. The check was endorsed on the reverse by [redacted] signature and processed on 9/17/2001 at 4:48 p.m. for cash, as per the time/date stamp below the endorsement.

b6
b7C

There is a fifteen-hour and twenty-minute period from 4:48 p.m. 9/17/2001 until [redacted] enters via "IN" access to building [redacted] at USAMRIID at [redacted] on 9/18/2001. No records were reviewed which can demonstrate [redacted] whereabouts for the fifteen-hour twenty-minute period. [redacted] stated in an interview that to the best of [redacted] recollection, [redacted] was home all night on 9/17/2001.

On [redacted] entered "IN" building [redacted] of USAMRIID and [redacted] finally exited "OUT" of building [redacted] at [redacted] a Fort Detrick vehicle acquired by BRUCE IVINS at 7:42 a.m. as per motor-pool records, to [redacted]. The vehicle was returned to Fort Detrick motor-pool at 3:42 p.m. on 9/18/2001.

b6
b7C

[redacted] wrote a personal check, [redacted] which was negotiated at the [redacted] at [redacted] on 9/18/2001 as per the [redacted] endorsement stamp on the reverse side of the check.

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 08/12/2003

b6
b7c

[redacted] made a long distance phone call on 9/18/2001 from [redacted] residence at 6:16 p.m. to [redacted] at [redacted] which lasted sixty-three minutes.

Time-Line Second Mailing (3:00 p.m., 10/6/2001 through 11:00 a.m., 10/9/2001)

[redacted] made a long distance phone from [redacted] residence on 10/6/2001 at 9:50 a.m. to [redacted] which lasted two minutes.

[redacted] wrote and negotiated a personal check at the [redacted] in [redacted] at 2:20 p.m. as per the endorsement stamp on the reverse side of the check.

[redacted] made a long distance phone call from [redacted] residence on 10/6/2001 at 2:47 p.m. to [redacted] in [redacted] which lasted four minutes.

[redacted] and [redacted] in the evening of [redacted] and [redacted] were at the [redacted] until late in the evening. No exact time was noted.

There is approximately a ten to twelve hour time period from the [redacted] on [redacted] during which no records were reviewed which can demonstrate [redacted] whereabouts until [redacted] at approximately [redacted] on 10/7/2001. [redacted] stated in an interview that [redacted] was with [redacted] that evening as far as [redacted] can recall.

An electronic attendance record from the [redacted] at [redacted] in [redacted] provided by [redacted] reports that [redacted] attended [redacted] that week.

There is approximately a forty-four-hour and nineteen-minute time period from approximately 10:00 a.m on 10/7/2001 to 10/9/2001 at 7:19 a.m, during which no records were reviewed which can demonstrate [redacted] whereabouts. In separate interviews, [redacted] stated that as far as they could recall, [redacted] was at home during this time period (10/8/2001 being a holiday).

b6
b7c

A review of [redacted] USAMRIID key card access showed that [redacted] entered "IN" building [redacted] at [redacted] on 10/9/2001 and finally exited "OUT" at [redacted]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 08/12/2003

b6
b7C

[redacted] was given a polygraph examination on [redacted] which targeted any knowledge of or involvement in the anthrax mailings. The report of the polygraph examination states that no deception was indicated by [redacted] during the polygraph examination.

[redacted] handwriting was reviewed and compared to the writing on the anthrax-laced letters by handwriting experts on [redacted] Results of the comparisons were negative.

[redacted]

[redacted] has been interviewed several times and has cooperated fully with this investigation. [redacted] is aware of [redacted] [redacted] and has been very helpful in identifying jointly used laboratory space and equipment as well as co-workers [redacted]
