**Subject:** Letter of Complaint Unacknowledged Special Applications Menwith Hill

Hello to you,

Enclosed for your interest is a letter of complaint the third of such letters made to Colonel Section 40 NSA Menwith Hill. No action to date has been taken against the individuals I highlight and the hidden veil of acceptable "do what we like to whoever we like" under the guise and excuse of national security remains ever present and a disgrace. We are all security orientated after 911 how dare somebody doubt the reality around them, we are all indeed brain washed to acknowledge a certain picture of reality.

Unacknowledged Special Applications Projects are highly classified operations that society at large does not see, hidden from funding, and kept quiet. I feel it right and proper to speak out against the conduct I have witnessed by staff involved in this particular project. My site Section 40 and my story of the continued persecution I have been subjected to at the sharp end of such conduct remains in place. Dr Stephen Greer also has material on Special Applications Projects @ [www.disclosureproject.org](http://www.disclosureproject.org) his material really is a great read.

It is important that the machinery of denial is wheeled on to lie and lie again over what has been happening at all costs the true agenda, the true actions of what such people like those I speak of are doing in a democratic nation must be hidden, it is disgusting and it as a result of such a classified system of security that people like those I speak of are aloud to spiral out of control. Just because somebody wears a uniform and pretends to serve a nation, I have learn't it accounts for nothing, other than there own corrupt self serving agenda. So in the rigorous denial that will probably raise it's head, we will see the lie for what it is.

The individuals I highlight here remain a clear and present threat to this nation and it is time for me and others to speak out against the men and women who have persecuted me from the premises at Menwith Hill. I know it has happened and the management of the premises also know it has been going on.

This then is to draw attention to the story at my web site in the hope others will also speak out.

If you have any questions please do not hesitate to contact me.

My blessings

Colonel Section 40

NSA FL83

Menwith Hill

Harrogate

16-12-03

Official letter of complaint third occasion

Dear Colonel Section 40

I write once again to express my concerns over the activities of men and women at your premises engaged in unacknowledged special applications projects with intelligences that remain hostile in intent to mankind. I am deeply, I stress again deeply concerned over there conduct.

I note with great anger that the management of your establishment has to date done nothing to stop the cancer that is Section 40 or is it Section 40 Section 40 even Section 40 with his female partner in crime. Names matter not but I warn you that these activities despite your denial remain a Threat to my nation and yours like a cancer within, A whole Operation has sprung up around my abilities you know it And I know it.

The activities of these people are not in anyone's interest Other than there own, and I stress again you know it is going on. But of course we are all taken in by the lie and cover up that you are defending the national Interest. I thank you to date for the apathy and total denial That will later contribute to an agenda that is not a war on terror but a war on humanity. To which your establishment is greatly contributing to in it's harbouring of those who are a state terror junta.

These people you are harbouring and covering up for are the real terror threat. Let us be correct here you are covering up for them and they are active from your premises to date.

I am utterly disgusted with the conduct of your establishment I have no doubt they are all very proud of the actions they are doing to the population at large, I have no doubt NSA command sleeps well at night knowing such lunatics are Are on the rampage in such establishments. It is no fun at all writing letters and having my mind and life made a misery by people simply out of control.

This is cover up, and corruption at the highest level from these premises. The man who lifts the barrier to admit them onto the site to do these corrupt activities is as bad as those who look the other way.

In anger

 Subject: Sorry Section 40 poor response denial lies and cover up  
 Hi Section 40

With regret Section 40 your reply is unfortunately limited in scope, as these events are happening at different levels and the MOD continues to be aware of what is going on as does the government, I will close correspondence with you but let me register my disgust at what has been going on and what is indeed a total cover up and whitewash. You perhaps are fully aware as is the RAF of the incident in February 02 and I am being lied to. You will see it in the months ahead unfold. Police action may with regret be toothless against this junta. I remain concerned regarding the activities of them.

My disgust and anger.

UFOs

Dear Section 40

I am writing regarding your e-mail message of 5 November concerning UFOs and your views on RAF Menwith Hill.

I have explained the Ministry of Defence's limited interest in 'UFO' sighting reports and that the MOD knows of no evidence which substantiates the existence of extraterrestrial lifeforms. I therefore have nothing further to add on these matters.

With regard to your allegations about staff at RAF Menwith Hill, if you have reason to believe that you are being harassed by anyone, this is a matter for the civil police.

I am sorry that I can not be more helpful.

 Subject: Re: Complaint regarding UFOs your reply is bullshit Air 2A

Dear Section 40

Your reply is a total lie and my mind has been and still is being invaded by technology that is well documented, I am sick and tired of excuse after excuse, and denial after denial regarding the activities these people are doing. That appears to cause a serious stench of what can only be described as bullshit. I am very sorry Section 40 but tough situations require me to say your response is bullshit.

Across the UK this population is being targetted by a group of individuals who are indeed operating as a highly elite power bloc with access to information that even you the MOD do not have. There are two points that spring to mind. I have on my web site a log of constant and persistant torture that has been instigated by these individuals using a form of radio technology. Rather easily however multi million pound signal detection technology cannot detect this. Secondly the staggering lie by the Air Chief Marshall that this is not happening beggars belief. & my harrassors are very proud of the fact that they can lie very easily and cover up there tracks. No Menwith Hill have engaged in the persecution of me constantly and have made my life living hell. In Feb 02 an incident did occur with two RAF jets despite the official reply, you know who the pilots are and you even know what air field they were from. The RAF it appears are lying continually. &n! bsp;I have no doubt I am now seeing a cover up at the highest level so that these individuals may continue there technologically violent orgy across the UK. I am not disappointed in any way that this is what they would do. Nobody has dared to confront me from that establishment because I know fully what is going on. These are hostile activities against the population of this nation. The authorities also appear reluctant to find out.

The apathy denial, and total rubbish reply by your department and others makes me furious. Your reply Sections 40 be frank total dross. The consequences of these individuals left unchecked raise serious national security concerns. Menwith are the people responsible. We have nick name for them Section 40 they are called "The King of cover up" and are well renowned for this deployment of this technology which is meant to be classified. I do not "believe" Sections 40 as you put it, I know it is a fact, and I also know that you the MOD are lying too me. You should indeed check your facts Section 40 what is going on, as should your department. There are others who know what has been going on.

I trust these e-mails have been relayed to somebody in authority if not why not ? and may I further register my utter disgust with this affair, and please pass my comments. The UK should remain concerned over the activities that is going there. How long do you lie for ? The Air Chief Marshall despite his denial does know that is going on as does everybody else, but suddenly we have memory loss, suddenly it is all denial and whiter than white.

I am utterly disgusted and the reply is total dross.

Come up with something better please MOD.

Your reply is sick and disgusting in terms of what I have gone through.

I enclose for you Section 40 document regarding the technology I "BELIEVE" which I find offensive

06/11/2003

that has been used on me, perhaps during the lunch hour in the pub you at the MOD might be bothered to look at it.....

At the end of the day **Section 40** are only doing your job, however there are some appalling activities going on behind the scenes and my correspondence to you is not the rant of some nutter. Take note. I hope this will be passed to the CDS and his department who also despite the denial are fully aware of what RAF Menwith Hill has done too me in terms of top secret activities resulting in illegal experimentation and the enforcement upon me of the silence on UFO's.

United we will stand or divided we will fall.

Should this situation continue I will escalate to the level of the United Nations human rights department as the activities of these people are in clear breach of UN law.

## Mind Control Part 4

# High-Tech Crimes and Electromagnetic Madness

by Arlene Tyner

0005498

---

Readers' comments about this article. You may add yours; see this comment page for submission details.

---

## Introduction

This article was completed in July 2001, months before the catastrophic attack of September 11, 2001 in New York City and Washington. It contains research that eerily suggests the possibility that the World Trade Center/Pentagon hijackers could have been hypnotically programmed to murder thousands of innocent people while taking their own lives. So says psychiatrist Colin Ross, author of BLUEBIRD: Deliberate Creation of Multiple Personality by Psychiatrists. In a 9/13/01 essay Ross writes, "Psychiatric mind control could be used to create a terrorist like those who hijacked the airplanes on September 11." (<http://www.rossinst.com/terrorism.htm>). This view is buttressed by a 1952 declassified document from the CIA's Bluebird program. Among a series of questions its psychiatric contractors would be researching is the following: "Could we seize a subject and in the space of an hour or two by post-H control have him crash an airplane, wreck a train, etc.?" ("Post-H" stands for post-hypnotic)

Mohamed Atta, alleged to be the ringleader of the hijackers, is described by a British woman as being in a perpetual "trance-like state," wearing an icy, hypnotic expression. "I will never forget his face. It was always set almost in a grimace like he was in a trance," said Anne Greaves, who knew him for six months at the Huffman Aviation Flight School in Florida. "I said 'hi' and he just looked straight through me as if I didn't exist." Greaves reported that Atta showed no emotion and walked toward the aircraft with the "air of somebody doing something they don't really want to do." (Birmingham Evening Mail, 9/24/01) Mohammed al-Amir, Atta's Egyptian father, adamantly refused to believe the gentle son he knew could commit such a horrific crime, adding, "My son hates bin Laden." Charging that his son was framed, al-Amir Atta insisted that a close examination of Atta's picture printed in newspapers showed that his son's face had been superimposed on another man's head. (Deutsch Presse-Agentur, 9/24/01; Philadelphia Inquirer, 9/23/01)

This article completes a four-part series on Mind Control begun in 2000. The first three parts were published in Probe magazine in the March/April, May/June and July/August 2000 issues. Part 1: Canadian and U.S. Survivors Seek Justice can be accessed online at <http://www.webcom.com/ctka/pr300-mkultra.html>. Parts 2 and 3 are in print form only, but can be purchased from the Probe website: <http://www.webcom.com/ctka/backiss.html>

Arlene Tyner

October 2001

---

"I know the capacity that there is to make tyranny total in America and we must see to it that this agency [the National Security Agency] and all agencies that possess this technology operate within

the law and under proper supervision, so that we never cross over that abyss. That is the abyss from which there is no return."

Senator Frank Church, 1975 <sup>(1)</sup>

At 56, Admiral Jeremy "Mike" Boorda had everything to live for. As Chief of Naval Operations (CNO), he was at the pinnacle of his career. Supported by a loving family and widely respected as "an officer of legendary devotion to the Navy," why would the admiral suddenly and violently take his own life?

On May 16, 1996, Boorda was found shot through the heart on a bench outside his official residence in the Washington Navy Yard. The police instantaneously diagnosed "suicide." But Boorda's recent advocacy of suicide prevention cast an eerie shadow on the official story.

"Can the sailor commit suicide and not have the leader know that he or she was in distress?" the admiral had asked in a speech at the Annapolis Naval Academy the previous month. Answering his own query, he continued, "No. We can't ignore things we must work on and if we hide them, we do everybody a disservice." <sup>(2)</sup>

By all indicators, Boorda was not depressed. His wife and several admirals vouched for his high spirits only hours before his body was found. To intimates, it made no sense that he would destroy himself without warning. Furthermore, as one woman on an Internet listserv so astutely observed, "People who commit suicide by shooting do not do it in the chest." <sup>(3)</sup>

Mike Boorda was an unlikely suicide candidate for another, more personal reason. He and his wife Bettie were the main support for their first-born son David, who is legally blind and severely handicapped by congenital malformations. The Boordas raised him to adulthood in their own home while rearing three other healthy children, two of whom are Navy officers. Known to be very attached to David, the admiral had planned early retirement to spend more time with his family. <sup>(4)</sup> Would a responsible and loving father suddenly opt to leave his wife to care for their disabled son alone?

Midway into research for this series, a number of alleged mind control (MC) experimentees began sharing their suspicions that Admiral Boorda had been assassinated to prevent his speaking out against nonconsensual human experimentation in military weapons research. Blanche Chavoustie referred me to a sinister CIA document from the 1950s that entertains ways of "disposing" of experimental MK-Ultra subjects and people "who cannot be trusted" to safeguard military secrets. Chemical lobotomy, drugs, and "ultrasonics or some other radiating energy" were the methods suggested as possible alternatives to an "ice pick" lobotomy or permanently locking the person away someplace. <sup>(5)</sup> "Now, with new improved techniques," Chavoustie says, "victims such as Admiral Boorda have been known to self-destruct on their lunch hour." (See Part 2 of this series, May/June 2000 Probe for Chavoustie's story.)

Two additional people told me Boorda could easily have been done in by one of the surefire assassination methods the Navy has finessed after 50 years of covert research and field testing. This little-known secret slipped out on July 6, 1975 with an article in the London Sunday Times, "How the U.S. Navy Brain-Trains Political Assassins." The Times quoted a speech by Navy Lt. Commander Thomas Narut to a group of 120 psychologists at a NATO conference in Oslo, Norway. Narut worked at the U.S. Regional Medical Center in Naples, Italy. He reported the Navy had been programming "hit men and assassins" who would kill on command; some subjects were drawn from the ranks of convicted murders serving time in military prisons.

The "damage control" boys soon moved in. Narut was flown to London and forevermore silenced. The Navy issued a statement in his name saying his remarks were merely "theoretical." Newspapers were told the lieutenant commander was having "personal problems." Narut's loose lips reached the

U.S. only through the Chicago Sun Times (July 7, 1975).<sup>(6)</sup>

Corroboration for the existence of an operational MC assassination program can be found in a declassified Defense Intelligence Agency (DIA) document prepared by the U.S. Army in January 1972 (Author: J. LaMothe); Part III is titled "Mental Suggestion and Controlled Behavior." Section B elucidates how hypnosis can be used to create a multi-personality "super spy" assassin, based on the writings of psychologist and Army consultant George Estabrooks. (Part 2 of this series, May/June 2000 Probe documents the U.S. military's creation of Manchurian Candidates going back to World War II.)

A 5/26/95 article in The Herald (Glasgow), "Brainwash killers 'still in use'," contains information about a psychotronic influence system developed in the 1970s in the former Soviet Union that creates programmable "human weapons" through the use of hypnosis and high-frequency radio waves. The article warns that this system "has found its way on to the free market, where mobsters and private security firms are using it."

### "Self-Initiated Execution"?

From the earliest days of the MK-Ultra program in the 1950s, the CIA has systematically searched for execution methods that could be disguised as suicide. All indications are that the macabre Doctor Deaths of the military/intelligence world have succeeded, using untraceable electro-magnetic (EM) technology to commit the "perfect crime."

In 1995 Perceptions, an independent magazine dedicated to environmental, political and health issues, published a strange and scary story titled "The Secret War Against Medford, Oregon." Author Mark Metcalf revealed a 14-year-old conversation with Dr. David Fraser, former head of the Department of Toxicology at the University of North Carolina. Now deceased, Fraser had assembled a scientific team that traveled to Oregon to investigate an alarming cluster of suicides in the City of Medford (Jackson County) in the early 1970s.

With a 1970 population of only 28,454, the city saw the number of suicides between 1970 and 1975 rise from 2 to 10; in Jackson County the number shot up from 13 to 24. Suicide rates are calculated per 100,000 population and averaged in 5-year compilations. Although the number of suicides in and around Medford do not meet the usual criteria for reliable rate calculations, turning them into rates allows comparisons. In 1975 Medford's rate of 17 per 100,000 was higher than for Oregon (15.4) and for the USA as a whole (12.4).<sup>(7)</sup>

According to Metcalf, the scientists soon found that Medford was being bombarded with ultra low frequency (ULF) electromagnetic waves originating from a nearby military base. The commander of the military base told the investigators that he knew about the radiation but claimed it was caused by the Russians. However, the ULF bombardment mysteriously ceased the very next day after this confrontation. After they returned to the east but before the researchers could write up their report, Metcalf wrote, "Several men displaying CIA credentials arrived on campus and said that the ULF waves beamed into Medford were a 'national security' matter. They explicitly threatened to kill each of the researchers, including Dr. Fraser himself, should anyone speak further about it. As far as I know, no one did."<sup>(8)</sup>

On April 8, 1994, popular rock star/writer Kurt Cobain (of Nirvana fame) was found dead in his own home. He appeared to have been the victim of a shotgun blast to the head three days before. A deadly dose of heroin (three times over) was found in his blood. His so-called suicide note did not indicate he was going to take his own life. Many fans believe the evidence does not prove suicide and that Cobain was more likely murdered.<sup>(9)</sup> But why?

The answer may lie in a technical document purporting to reveal secrets of National Security Agency

(NSA) "psyops" (psychological operations) and systematic MC. Posted on several Web sites in 1999, it was provided by an engineer who claims he had worked as a consultant to the NSA and feared for his own safety as a whistleblower (hence the author's anonymity).

MC literature on the World Wide Web constitutes the cutting edge of serious research into radio frequency (RF) or directed-energy weapons (DEW). At the same time, one can easily find writings laden with wild, unproven charges and undocumented speculation. It is a daunting task to pluck the gems out of the confusion and purposeful disinformation, which are plentiful.<sup>(10)</sup> After two years of wading through bizarre personal testimonies, and filling up three file-drawers with scientific research, hundreds of periodical articles, patents, interviews, correspondence, and muckraking pieces that support the existence of powerful MC technologies,<sup>(11)</sup> I find this particular document compelling and worthy of serious study.

Among several examples of "NSA self-initiated execution (suicide)," it claims Cobain was a casualty of brainwashing who was "terminated" for "writing clues" about his victimization into his songs. "Once the NSA puts on the highest level of brainwashing pain, the subject expires quickly," this document alleges. "Cobain used heroin to numb and otherwise slow the effect of the brainwashing."<sup>(12)</sup>

Rauni Kilde, MD, former Chief Medical Officer of Finland, lectures and writes about an NSA MC system using radio implants and microchips connected to satellites that is remarkably similar to what is described in the "NSA psyops" document. "With electro-magnetic frequency (EMF) brain stimulation fully coded," she writes, "pulsating electromagnetic signals can be sent to the brain, causing the desired voice and visual effects to be experienced by the target. This is a form of electronic warfare." Kilde warns that "connecting our brain functions via microchips (or even without them, according to the latest technology) to computers via satellites...poses the gravest threat to humanity."<sup>(13)</sup>

### **The Boorda Mystery**

The Boorda mystery deepens when a whole range of facts gleaned from worldwide press coverage of his shocking death is integrated with the experiences of alleged MC experimentees. One woman told me that in March 1996 the Air Force and the Navy had finally opened investigations into her claim that she and about 500 other people were being tortured by remotely controlled, neuro-electromagnetic (NEM) or RF weapons. Bizarre stories alleging surveillance, electronic harassment and remotely controlled torture of people throughout the world are posted on many Web sites.<sup>(14)</sup> The amply referenced research of Cheryl Welsh, 1997 founder of Citizens Against Human Rights Abuse (CAHRA), supports many of these claims, especially "Nonconsensual Brainwave and Personality Studies by the U.S. Government," "The 1950s Secret Discovery of the Code of the Brain," and the Russian Book Translation Project.<sup>(15)</sup>

In an article published last year in Matrix 3000, Band 4, a German publication, Welsh writes, "Heart attacks, suicides, assassinations, blackmail, all can be done remotely leaving no trace of evidence to tie it to the perpetrators."

Blanche Chavoustie is one of a number of allegedly targeted individuals who had contact with Admiral Boorda's office shortly before he died. She points out that burial of the Navy MC investigation followed quickly upon the admiral's own interment; however the Air Force probe may still be open.<sup>(16)</sup>

The nagging suspicion that Boorda did not willfully self-destruct is bolstered by his renowned toughness regarding media attacks on the Navy and himself. Appointed by President Clinton in 1994 to overcome the long-running legacy of the 1991 Tailhook sex scandal, Boorda soon made enemies

within the military. The "old guard" considered him a "political admiral" appointed to dismantle the notoriously racist and sexist Navy culture. They were angered at decisions that halted the career advancement of high-level male personnel and supported the promotion of Navy women and ethnic minorities. <sup>(17)</sup>

But Boorda very publicly asserted he would not fall into the trap of feeling sorry for himself. He was popular among rank and file sailors. Eulogized as a "sailor's sailor," he was the only enlisted seaman to rise to CNO in the nearly 200 years of Navy history. This made him an outsider, resented by the blue-blood admiralty. As the Guardian of London aptly put it, "Admiral Boorda was short (5 ft. 4 in.), Jewish, clever, gregarious, astute and knew his own mind. He was hardly the Platonic role-model for the man to command the most WASP-ish and hereditary of the U.S. armed services." <sup>(18)</sup>

The admiral's body was found just after 2 p.m., about one-half hour before he was to meet with two Newsweek reporters at Navy headquarters. In the official story, Boorda abruptly went home for lunch after being informed by Rear Admiral Kendell Pease to expect accusations that he lacked authorization to wear two Vietnam-era, bronze "V" pins (decorations that signify valor in battle).

Pease later told the press that Boorda had not appeared unduly upset at the prospect of such questions and responded matter-of-factly, "We'll just tell him the truth." Boorda had already removed the tiny pins from his uniform the year before when questions were first raised about them. After lying dormant for a year, the medals issue was suddenly pushed into public view as the most plausible motivation for Boorda turning a pistol on himself. One of the two typed notes found beside Boorda's home computer was addressed "to my sailors" and said, "I couldn't bear to bring dishonor to you." <sup>(19)</sup>

An inch-thick report by the Naval Criminal Investigative Service was inconclusive as to Boorda's motive for suicide. It cited several unnamed people who insisted the admiral was not distraught in discussing the medals query. Significantly, the autopsy report was never made public. A blacked-out version was secured by the NYT under the Freedom of Information Act (FOIA), lending credence to suspicions of a coverup. <sup>(20)</sup> If the autopsy unambiguously substantiates a self-inflicted gunshot to Boorda's chest using the .38 handgun given him by his son-in-law (as reported by the media), then why keep it secret?

### **Boorda & "Cognitive Warfare"**

The Guardian reported on May 18, 1996, there was "another cruel twist to Admiral Boorda's death" regarding a newspaper. It revealed that Boorda had finally agreed to give "his first full interview" for a series called "Bosnia: The Secret War." <sup>(21)</sup> Few Americans know of the admiral's role as advisor to President Clinton during the controversial U.S. intervention in Bosnia. From 1991 to 1994, Boorda was Commander-in-Chief of U.S. Naval Forces in Europe and Commander-in-Chief of Allied Forces in southern Europe, based in Naples, Italy. Despite "his position," Boorda had agreed to speak to the London newspaper on unspecified "highly controversial themes."

"The last years of Boorda's career were marked by his insistence that the US take a robust line and intervene militarily in the carnage of Bosnia-Herzegovina," the Guardian said. "This opinion became the admiral's anthem, and both isolated and vindicated him within a Pentagon which was stubbornly resistant to intervention." <sup>(22)</sup> Could military opposition to Boorda's Guardian interview have played a role in his untimely and inexplicable death?

In October 1996 the respectable, Paris-based Intelligence Newsletter alluded to "lurid reports" that Boorda "was murdered because he was about to reveal sinister undertakings by the Navy in mind control and brain warfare." It disclosed that the admiral "was deeply involved in a study on the possibilities of cognitive warfare, a form of mind control that uses acoustical, optical and

electromagnetic fields or a combination of the three to interfere with the biological processes of an enemy." (23) This information provides a compelling reason to see the medals controversy as a bogus motivation for suicide. Corroboration for the existence of "cognitive warfare" can be found in *New World Vistas*, a 16-volume, 1996 Air Force publication. The section on "biological process control" says that it is possible "to create high fidelity speech in the human body, raising the possibility of covert suggestion and psychological direction...[making it] possible to "talk" to selected adversaries in a fashion that would be most disturbing to them." (24)

The Intelligence Newsletter reported that Boorda headed a secret body called the Strategic Studies Group investigating technologies for producing speech and "covert suggestions" in the "enemy's head." It said further, "The same techniques, say the experts, could be used to prevent voluntary muscular movements, control emotions and actions, produce sleep and interfere with short-term and long-term memory."

Could it be mere coincidence that these same biological and psychological effects had been reported by CAHRA members to Navy and AF investigators in the months preceding Boorda's sudden demise? Many alleged experimentees also say they hear artificial voices inside their heads or receive thoughts that are not their own! Did Admiral Boorda find out about nonconsensual human experimentation conducted by the Navy, raise ethical objections or even order them to cease, thereby rendering himself too dangerous to live?

### **Questionable "suicide" of Aussie Attache**

If Boorda was "taken out" by means of MC technology that induces "suicide" by remote control, he may be the highest ranking official in recent years to have met this fate. But by no means is he the only such suspected case of murder most foul.

On June 13, 1999, in the Washington suburb of Arlington, Virginia, Mervyn Jenkins, the North American attache for the Australian Defence Intelligence Organization (DIO) was found hanged in the backyard of his home a week before the Jenkins family planned to return to Australia. Jenkins, an expert in covert action and electronic warfare, had been posted in Washington for a three-year assignment. He had been stressed by bureaucratic infighting between two Australian intelligence agencies over which documents could be shared with the CIA and the DIA. But would this happily married father of three sons take his own life on his 48<sup>th</sup> birthday? His diary showed detailed plans for his life in Australia 10 weeks into the future.

On April 16, 2001, the Australian Broadcasting Corporation's (ABC) popular investigative news show "Four Corners" probed Jenkins' mysterious "suicide," which had produced a storm of criticism in Australia, leading to a government investigation. Not satisfied with the results (the Blunn Report), Jenkins' wife filed a lawsuit against the government. Both his wife and mother appeared on the ABC broadcast, a transcript of which is posted online. (25)

Betty Daly-King believes Jenkins was murdered to prevent him returning home with knowledge that the Pentagon didn't want him to bring back to Australia. Daly-King is a Western Australia peace and human rights activist who claims she has been tortured with DEW in retaliation for 40 years of working for alternative means of resolving conflicts that lead to war. Focused on ensuring peace in the Indian Ocean region, she is responsible for peace studies professorships in two Perth universities. Daly-King cites several other cases of DEW being used to silence scientists, activists and writers, just in Western Australia alone.

According to the official story laid out by "Four Corners," Jenkins was caught in the crossfire between U.S. and Australian intelligence agencies over the issue of intelligence sharing. Daly-King believes that the conflict centered on the Indonesian repression of East Timorese who had voted for independence, with the U.S. backing the Indonesians and the Australians leaning toward the East

Timorese independence fighters. Influential Australian organizations such as the Returned Servicemen's League have historically sympathized with the East Timorese because so many had risked their lives to save Australians during World War II, she explains, and people-to-people relationships have been maintained ever since. <sup>(26)</sup>

"The USA would do anything to appease Indonesia to keep access through their straits to get to and from Saudi's oil," she wrote to me. "They were not amused at Australia being in the forefront of restoring East Timor against perceived Indonesia and USA interests! All that lovely East Timor offshore oil, too."

A map of the Washington area posted on the ABC Web site is chilling in its implications. With large red dots, it visually depicts the Jenkins home in Arlington surrounded on three sides by the Pentagon, the CIA, the DIA headquartered at the Bolling Air Force Base, and the British, Canadian and Australian embassies. <sup>(27)</sup>

### **Mysterious Deaths in the British Defense Industry**

An epidemic of unexplained deaths in England's defense industry occurred from 1982 to 1988 (totally blacked out of the "free" U.S. press). Twenty-five British computer programmers and engineers working on electronic warfare programs died in a rash of suspicious suicides, disappearances, and bizarre accidents. They were the subject of British journalist Tony Collin's 1990 book *Open Verdict: An Account of 25 Mysterious Deaths in the Defence Industry*. Five of these scientists were talented computer programmers who worked for Marconi Underwater Systems (a major contractor for the Reagan Administration's "Star Wars" Strategic Defense Initiative or SDI), or one of its subsidiaries. Many worked for the government or military installations directly. Britain's nuclear arsenal is submarine-based. Most of the dead programmers were working on top-secret simulator programs used in underwater submarine deception warfare. "In the majority of cases, there were no eyewitnesses and the periods before their deaths could not be explained," Collins writes <sup>(28)</sup>

Investigations began when two young men were found in Bristol, more than 100 miles from their homes, where they had no apparent connections. In 1986 Vimal Dajibhai, 24, was found under a bridge with an unexplained puncture mark on his thigh and his pants down around the ankles. A few months later Arshad Sharif, 26, alleged hanged himself by tying one end of a rope around his neck, the other end lashed to a tree, and accelerating his car until his neck snapped. Family members interviewed by Collins said the two men were actively planning their futures and had no motive for suicide. Shortly thereafter, PhD student Avtar Singh Gita, 26, who was working on submarine warfare under a grant from the defense industry, disappeared from Loughborough University. Singh Gita's thesis was titled "Underwater Signal Processing." He was found in Paris months later, but could not recall why or how he got there. <sup>(29)</sup>

Several gifted scientists and programmers employed in other branches of the defense industry died under suspicious circumstances in 1987. Peter Peapell, 46, a simulator expert in stealth and EW, was found underneath his car with the engine running. David Sands, 37, allegedly drove at high velocity into a brick wall, after filling his car with cans of gasoline. Richard Pugh, 37, was found dead in his home with a plastic bag over his head and his feet tied. Royal Air Force computer specialist Mark Wisner, 25, was also found suffocated by a plastic bag. Dr. John Brittan, 52, was found dead in his garage with the car running; he had been a computer expert at the Royal Armaments Research and Development Establishment. In 1988 the body of Russell Smith, 23, who worked for the United Kingdom Atomic Energy Authority in Harwell, was found on a cliff. Family members of these deceased individuals indicated no motive for suicide. <sup>(30)</sup>

Tony Collins concludes that "psychological engineering" of suicidal behavior is a possible explanation for these unexplained deaths. His conclusion is based on the experience of Australian engineer and investigative journalist Joe Vialls who says he survived such macabre manipulations in

1983. Vialls had become unwittingly involved in a Cold War espionage operation while working on a sensitive oil drilling operation in India. He reports he suffered both microwave radiation and post-hypnotic suggestions implanted electronically by unknown controllers, whom he suspects were working for the CIA. Doctors who treated Vialls at the London-based Medical Foundation for the Care of Torture Victims verified that he was susceptible to clandestine hypnosis and post-hypnotic suggestions. Vialls, whose story can be found in Collins' final chapter, has published a book and many articles on suspected Manchurian Candidate-type assassinations as well as exposes of the U.S. military's Omega above- and underground communication system, which he believes has the capacity for mind control operations worldwide. <sup>(31)</sup>

### Europeans Reject Invisible Weapons

Warnings on the perils of electronic MC can be found in the European press. Scientists, intellectuals and government officials there have been banging the warning drums for several years about dangerous U.S. surveillance and NEM technologies. <sup>(32)</sup> A 1997 editorial in the British Medical Journal alerted the healing profession to "guard against its knowledge being used for weapon development." Written by surgeon Robin M. Coupland, the editorial warned that the new category of "non-lethal" (NL) weapons, including "devices generating infrasound or electromagnetic waves, and devices for riot control," was not covered by existing international treaties banning chemical and biological weapons. <sup>(33)</sup>

In 1998 a neuroscientist at the Institut Pasteur in Paris cautioned that "advances in cerebral imaging" were "capable of being used at a distance" and would "open the way for abuses such as invasion of personal liberty, control of behavior and brainwashing." Another researcher at the French Atomic Energy Commission said imaging techniques have reached the stage where "we can almost read people's thoughts." <sup>(34)</sup> In 1998 the Scientific and Technological Options Assessment (STOA) panel of the European Parliament "shocked European leaders" with its voluminous report subtitled "Appraisal of Technologies of Political Control." The CIA's mind control (MK-Ultra) program is fully referenced therein. <sup>(35)</sup>

On January 28, 1999, while Congress and the U.S. media were diddling with the impeachment of President Clinton, the European Parliament passed a resolution calling "for an international convention introducing a global ban on all developments and deployments of weapons which might enable any form of manipulation of human beings." <sup>(36)</sup> And a 1999 UN-sponsored conference on human consciousness passed an ethics resolution urging neuroscientists to ensure their discoveries are used to serve "human welfare, never warfare." What is known as the Tokyo Declaration declares, "Today, we have the intellectual, physical and financial resources to master the power of the brain itself, and to develop devices to touch the mind and even control or erase consciousness." <sup>(37)</sup>

Secret MC technologies have already been used by U.S. armed forces in Third World interventions without any public discussion. According to Judy Wall, editor of Resonance (newsletter of the Mensa Bioelectromagnetics Special Interest Group), the EC-130E Commando Solo aircraft, built by Lockheed at a cost of \$100 million each, conducts psychological operations through broadcasts "in the standard AM, FM, HF, TV and military communications bands." Wall discovered that Commando Solo is equipped with Silent Sound Spread Spectrum, a MC technology that can "entrain the listener's brainwaves into a preselected emotional state." <sup>(38)</sup> Commando Solo aircraft were used as far back as the 1983 U.S. military intervention in Grenada, and later in Panama, Haiti, Bosnia-Herzegovina, and Iraq. <sup>(39)</sup>

The British ITV News Bureau reported that this technology was used in Operation Desert Storm in 1991 to demoralize Iraqi soldiers and instill "a perpetual feeling of fear and hopelessness." <sup>(40)</sup> In "Military Use of Mind Control Weapons," Wall exposes how human brainwave patterns known as "emotion signature clusters" can be stored on a computer, then piggybacked to Silent Sound carrier

frequencies to "silently trigger the occurrence of the same basic emotion in another human being." Voice commands can also be used in subliminal messages attached to music.<sup>(41)</sup>

The U.S. military's secret strategy for post-cold-war conflicts "short of war" is called "The Revolution in Military Affairs," a deceptively futuristic scenario based on an arsenal of grotesque psychotechnologies unknown to the American taxpayers who fund their development. Among the new military-speak one finds "strategic personality simulation," exactly the sort of neofascist MC that could explain the bizarre harassment stories of many hapless civilians.<sup>(42)</sup> Readers still skeptical about the existence of MC technologies are urged to check out "The Mind has No Firewall," an article published in the Army journal *Parameters* (Spring 1998).<sup>(43)</sup> Evidence of plans to incorporate mind control in future wars is as unambiguous as it is repulsive.

### **Constructing Thoughtforms to Order?**

Former Navy engineer Eleanor White traces her victimization as an alleged involuntary NEM experimentee to the spring of 1980 when she asked the Bureau of Naval Personnel to update her service record. The harassment began later that year -- on the street, at work, and in six successive apartments, she claims. "I just thought I was the unluckiest human being on the planet, entirely unique and alone," she says, until 1996 when she found Ed Light's Mind Control Forum on the Internet.<sup>(44)</sup> "The near-perfect congruence of my effects with what others were experiencing was like entering a whole new life." This sameness of "effects" is reported by hundreds of people throughout the world. Many are well-educated and hold down responsible jobs; others are physically and psychologically disabled by torturous hospitalizations and years of abuse. The sheer volume of their highly literate communications convinces me that every allegation of psychological-warfare experimentation cannot be conveniently pigeon-holed as the paranoia of a disturbed person.

Eldon Byrd has been similarly persuaded. A medical engineer, Byrd is retired from the Naval Surface Weapons Center, Office of Non-Lethal Weapons. A member of the U.S. Psychotronics Association (USPA), he has published papers on the telemetry of brain waves (measuring them wirelessly from a distance),<sup>(45)</sup> and the psycho-activity of extremely low frequency (ELF) electromagnetic and scalar fields. After corresponding with White and other alleged experimentees for several years, he concluded they were neither hallucinating nor allergic to ELF waves. "You have convinced me that this is something going on that should be investigated," Byrd wrote White. He affirmed that "images can be projected directly into a human brain from a distance using the 'scalar' component of a weak magnetic field." But he questioned who would be so evil as to inflict this technology on unsuspecting people?<sup>(46)</sup>

Lt. Col. Thomas E. Bearden, also a member of USPA, is a PhD scientist, nuclear engineer, and proponent of "the new physics," which may be crucial to understanding the MC technologies developed by the U.S. military-industrial complex. Bearden publishes *SPECULA*, a magazine devoted to psychotronics and bio-energetics.<sup>(47)</sup> His books include *The Excalibur Statement*, *Analysis of Scalar Electromagnetics*, and *Gravitobiology: A New Biophysics* (Tesla Book Company). In a February 1991 interview conducted by Michael Hutchison, editor of *Megabrain Report*, Bearden revealed that "scalar electromagnetic phenomena" make it possible to construct "thoughtforms to order, and input them directly into the mind and longterm memory." This can be done through "a hidden channel to pipe in inputs" and it can be done "surreptitiously, from a distance and without the knowledge and consent of the individual affected," he said further. Bearden calls this "the ultimate mind control."<sup>(48)</sup>

On July 23, 2000, Byrd delivered a paper to the 26th annual conference of the USPA in Columbus, Ohio, titled "Recent Advances in Scalar Technologies." He told the audience that many people claiming they are victims of remote MC devices appeared to be highly functional, and that there must be something to their claims. He pointed to thousands of documented cases during the Cold

War of the U.S. government experimenting on citizens without their knowledge or consent.

He then cited a July 2, 1997 statement by Major General Sydney Schacknow of the Army's Special Forces (Ft. Bragg, North Carolina) that our military was "working on synthetic telepathy (the ability to read people's intentions at a distance using a magnetic laser -- a maser operating at extremely low frequencies," which can "alter behavior at a distance." In private conversation, Byrd told one participant that Marines had been shown a device that projects images into the brain from a distance, and that a Superconductor Quantum Interference Detector or SQUID machine (a sophisticated EEG device) can detect the mysterious rays many people suspect are causing them pain.<sup>(49)</sup> Byrd's paper at the 2001 USPA meeting in Columbus, Ohio, July 20-23, is titled "Mind Control: Paranoid Delusions or Frightening Reality?"

### **Synthetic Telepathy**

"Synthetic telepathy is a term used to describe the beaming of words, thoughts, or ideas into a person's mind by mechanical means...some type of electromagnetic transmitter...operating in the microwave frequency band," begins a May, 1995 article by Judy Wall in Resonance.<sup>(50)</sup> The first known U.S. experiment in which audible voices were communicated via pulsed microwaves was carried out in 1973 by Joseph C. Sharp and Mark Grove in Walter Reed Army Institute of Research in the USA. Their success was based on biophysicist Allen Frey's post-WWII experiments with "microwave hearing." <sup>(51)</sup>

Commenting on Sharp's "pulsed microwave audiogram" in his 1985 ground-breaking book, *The Body Electric*, Robert O. Becker, MD, points out, "Such a device has obvious applications in covert operations designed to drive a target crazy with 'voices' or deliver undetectable instructions to a programmed assassin." He also noted, "Nearly two-thirds of the \$47-billion 1984 federal research budget went for military work, and in the field of bioelectricity the proportion was even higher." In denouncing "the buying of science by the military," Becker boldly declared, "To call it a form of prostitution is an insult to the oldest profession." Becker was twice nominated for the Nobel Prize in Medicine, but his career suffered because of his condemnation of the military uses of bioelectric research.<sup>(52)</sup>

Two years ago the career of SUNY-Albany Professor Kathryn Kelley also suffered a setback because of her probes into the mysteries of MC. In August 1999 Kelley's provocative research on the surgical implantation of communications devices to read thoughts was suddenly shut down. She had delivered a paper to a professional conference in Orlando, Florida, in which she described acoustic implants in human beings called RAATS (short for radio wave, auditory, assaultive, transmitting implants). Kelley wrote, "When (short-wave) operators transmit to or scan RAAT implants in victims, they can talk to the victims remotely and anonymously, and hear the victim's speech and thoughts." <sup>(53)</sup>

### **"The Bionics of Man"**

In 1962 Dr. Leonid L. Vasiliev, an internationally known Russian physiologist, remarked that "the discovery of the energy underlying ESP [extrasensory perception] will be equivalent to the discovery of atomic energy." <sup>(54)</sup> The word "psychotronics" was actually coined by Czechoslovak researchers to legitimize parapsychology as a scientific discipline. The Czech Manifesto adopted at the 1968 Moscow Parapsychological Conference declared, "Psychotronics is, in essence, the bionics of man." <sup>(55)</sup>

In the 1950s Soviet researchers invented a medical device called the LIDA machine, which uses modulated ELF waves to induce a trance-like hypnosis in human beings. According to a 1993 Defense Electronics article, a Richmond, Virginia company called Psychotechnologies

Corporation now holds the LIDA patent, euphemistically called "psycho-correction technology." <sup>(56)</sup>

The Soviets were also the first to use EEG machines to catch "the moment when telepathy lights up in the brain." However, the U.S. came in a close second. In 1959 secret ESP research on the U.S. atomic sub Nautilus made headlines in France. Journalists asked the sensational question, "Has the American military learned the secret of mind power?" <sup>(57)</sup> The U.S. officially denied the Nautilus experiments. But Carol Rutz remembers being taken aboard this ship when she was 10 as part of a CIA MK-Ultra psychic assassination research program. Rutz reports being trained to send psychic energy to a "certain high-placed individual" to create a deadly aneurysm! <sup>(58)</sup> (See Part 3 of this series, July/August 2000 Probe for secret government experimentation using children.)

To understand the progression of electronic MC technologies from the 50s through the 90s, readers will benefit from consulting two online timelines composed by Judy Wall and Cheryl Welsh, respectively; a Fact Sheet with documentation on Nonconsensual Experimentation prepared by Welsh; and a bibliography titled "Psychoactivity of Electromagnetic Fields." <sup>(59)</sup>

### "Zero-Evidence Weapons"

"For the first time in history," Eleanor White writes, "one human being, from hiding, at a distance, can control the thoughts and actions of another, by way of undetectable hypnosis, using still-classified electronic technology. These devices have totally disabled the world's justice systems." A board member of CAHRA, White has compiled the collective research of its members into a 136-page report, "The State of Unclassified and Commercial Technology Capable of Some Electronic Mind Control Effects." <sup>(60)</sup> She warns that anyone with knowhow and enough money could assemble an arsenal from ordinary (but expensive) electronic equipment and be totally immune from prosecution. "Zero-evidence weapons," she says, "make revenge crimes routine and easy." In the March 2000 issue of *The American Reporter*, White calls for debate and controls on all manufactured MC devices. <sup>(61)</sup>

In the late 1980s, activists in the Greenham Common Women's Peace Camp began experiencing headaches, nausea, vertigo, depression, disorientation and short-term memory loss. They were camped outside a U.S. Air Force Base in Great Britain to protest nuclear weapons and global militarization. Strong signals of non-ionizing radiation (microwave) up to 100 times the normal background level were detected there. Women peace activists in Seneca, New York, experienced similar harassment. <sup>(62)</sup>

Julianne McKinney, an ex-CIA case officer, believes she has been intentionally targeted by EM weapons. The painful harassment made her arms bleed, her gums rot and her teeth crack. In the early 1990s, she conducted an Electronic Surveillance Project, an offshoot of the Association of National Security Alumni. Her 22-page booklet, *Microwave Harassment and Mind Control*, published in 1992, documents many claims of NEM harassment. <sup>(63)</sup>

White has coined the term "voice-to-skull" (v2s) to describe an effect reported by hundreds of people. But White herself does not hear voices. "In my case and a few others," she says, "v2s is restricted to fake alarm clocks ringing at 3 a.m, fake phone or pager ringing, and fake bird choruses when no birds are around." In-home attacks include forced awakening and sleep deprivation, "hot needles" in the flesh, sexual stimulation, body vibrations and itching, limbs jerking wildly, and muscles manipulated remotely (vocal cords forced to produce sound against her will). White says she also suffers apartment break-ins with items stolen and clothing ripped. At work, she has experienced mind-blanking attacks and inexplicable computer malfunctions. Although she acknowledges that "the actual weapons now in use are tightly classified," she discovered through years of research that "the primitive weapons leading up to the current crop are mostly unclassified

and some are even commercially available." (64)

White's Web site, <http://www.raven1.net>, contains a storehouse of credible research on government-sponsored MC experiments and technologies. It is a magnet that draws in people from all over the world searching for answers to the weird bio-electric phenomena experienced in their own bodies, homes, and communities. Thanks to White's e-mail exchange depot, I have corresponded with many highly articulate people from all walks of life, and have interviewed some by telephone. For example, I have learned of several cases where people discovered through x-rays or MRIs that family members had been implanted with biochips during minor surgery, without their knowledge or consent.

Biochips, now the size of an uncooked grain of rice, are easily implantable for beneficial uses as well as for surreptitious political control. Applied Digital Solutions is now testing and marketing its "Digital Angel" technology, a biochip that makes possible the tracking of people using Global Positioning Satellites. (65) British Professor Kevin Warwick and his wife are being implanted with biochips to test whether they can read each other's thoughts when separated by distance. (66)

### **DSM-IV: Diagnosis or Coverup?**

CAHRA members complain about the knee-jerk reactions of U.S. physicians (especially psychiatrists) to their suffering. Some have had bouts with hospitalization where they were subjected to forced drugging and electroshock. Many fear sharing their torments with family and friends lest they be labeled "paranoid schizophrenic" because they hear voices, suspect they are under some kind of surveillance, or suffer debilitating bio-electric attacks.

Many alleged experimentees felt somewhat vindicated, however, when they read the opening words of a 1997 NYT Magazine cover story, "For decades, those who claimed to be victims of clandestine radiation experiments conducted by the United States Government were dismissed as paranoid." (67) The Clinton Administration exposes on radiation experimentation using thousands of unsuspecting North Americans opened the door for alleged MC experimentees to speak publicly about their claims.

The first three parts of this series have documented how past leaders of the American Psychiatric Association (APA) were secretly involved in military/CIA MC research using nonconsensual human subjects, especially women and children in their care. Is it happenstance or coverup that many reported symptoms of NEM weapons have been written into the diagnostic categories published in the APA's Diagnostic Statistical Manual IV (DSM IV)?

One DSM IV criterion of "schizotypal personality disorder" is "belief in clairvoyance, telepathy, or 'sixth sense.'" Under such a sweeping definition, the entire cabal of military/intelligence psychic experimenters (including privatized, Pentagon-funded outfits like Psi Tech) could be labeled "schizophrenic" for indulging in "remote viewing" (ESP) research for decades! (68) Significantly, a History Channel offering called "Psychic Espionage," aired in September 2001, never ridiculed or cast "mental illness" aspersions on any of the male scientists and CIA Stargate functionaries who were interviewed.

Rauni Kilde believes that "psychiatrists working for U.S. intelligence agencies no doubt participated in writing and revising" what has become a worldwide psychiatrists' bible. "Victims of mind control experimentation are thus routinely diagnosed, knee-jerk fashion, as mentally ill by doctors who learned the DSM "symptom" list in medical school," she says. (69)

N. Renay Tanner suggests that people who suspect they are targeted by electronic MC seek legal remedies and medical assistance through human rights organizations rather than the medical profession. A Columbia University graduate student focused on psychiatry and human rights, Tanner

is also United Nations liaison for Support Coalition International, a human rights organization devoted to eliminating abuses by the mental-health industry. Tanner believes the mental health system functions for the purpose of social control top-down and that "ideologically driven" psychiatrists who cannot admit to any evidence of fallibility will not help ameliorate the stresses and trauma of nonconsensual experimentation.

### Security Agency "Cutouts"?

CAHRA leaders bristle at suggestions that their pain may be caused by some condition other than purposeful manipulation by government-funded operators. They justifiably point to the MK-Ultra program and the thousands of documented cases of nonconsensual experimentation.<sup>(70)</sup> Still, most people offer no independent corroboration for their claims other than pointing out symptoms in common with other alleged victims and research proving that anti-personnel, directed-energy weapons do indeed exist.

One has to be skeptical of unscientific, long-distance evaluations of individuals based solely on uncorroborated verbal reports, often communicated via the anonymity of e-mail. After all, many known physical ailments such as electrical sensitivity and fibromyalgia could produce similar symptoms in different people.<sup>(71)</sup> Some painful effects may also be due to allergic reactions and EM pollution. Any number of people who corroborate each other's symptoms could be suffering from what a recent New York Times magazine article called "culturally specific" mental illness.<sup>(72)</sup> With suspicion about unethical government-financed experimentation more the rule than the exception, and widespread computer networking by people searching for answers to their problems, the stage is set for an epidemic of self-diagnosed victims. How does one separate out genuine experimentees from people whose symptoms may have physical or emotional causes not connected with MC at all?

Some claims appear have more merit than others. And a few people have named their perpetrators as connected to private security services, Air Force personnel, or huge military contractors such as Raytheon (likely involved in producing some of these weapons). For example, Pat Mougey's tormentors appear to be recruited by a security agency located on the street where she lives. She reports some harassers let her know she is under surveillance.<sup>(73)</sup> She believes they use commercially available, through-the-wall radar to tape everything that goes on in the privacy of her own home.<sup>(74)</sup> Mougey says she even saw herself through a window on the television screen in the house next door. I was skeptical about this until I saw NSA high-tech surveillance gadgetry on display in the Hollywood movie, "Enemy of the State." A private detective knowledgeable in surveillance devices confirmed that such gadgetry does exist in the real world and not just in the imaginations of Hollywood writers.

"They have a device to control every part of the body, including the throat," says Mougey. "I have been in the ER more than once because my throat was closed up and I could not breathe." I became convinced there may be truth in Mougey's claims by reading a 1987 report on the Attorney General's Conference on Less Than Lethal Weapons. It revealed that "scientific knowledge of human physiology is progressing to the point where it may soon be possible to target specific systems with specific frequencies of electromagnetic radiation...sustained, extremely low frequency (ELF) radiation [that] can produce nausea or disorientation..."<sup>(75)</sup>

But so long as human experimentation in weapons development remains subject to "national security" restrictions, it is impossible to know for sure whether specific individuals are experimentees in government or privatized operations. We do know, however, that our government spent millions on electronic MC research. One hundred thirty boxes (130 cubic feet) of classified documents on "behavioral experiments" the CIA's Office of Research and Development (ORD) were located in 1978. They were found after John Marks (author of The Search for the 'Manchurian Candidate') requested ORD files "on behavioral research, including...activities related to bio-

electrics, electric or radio stimulation of the brain, electronic destruction of memory, stereotaxic surgery, psychosurgery, hypnotism, parapsychology, radiation, microwaves and ultrasonics." (76)

### **Rogue Scientific Groups**

As I delved more into the scientific end of MC research, I became more convinced that the U.S. military/industrial complex probably has remote-control technology that can produce the torture Mougey and others so vividly describe. A 1999 article by engineer Tom Bearden, "Mind Control and EM Wave Polarization Transductions," corroborates my feeling:

"...rogue groups amongst Western clandestine mind control researchers will probably arise if they have not already done so. They will likely seek to increase their personal control and further isolate the programs from orthodox government review and from government and legislative control. They may even divert the research into highly illegal and unethical means, because it furthers their own rogue agendas. That is how clandestine U.S. government research can sometimes go sour, unless great care is exercised by the oversight committees in the House and the Senate.

Sometimes when rogue groups do gain control and total secrecy of a given new technological area, then what appears to be "U.S. government operations" do start to encompass a criminal and unethical operations [sic], hidden usually beneath the deep veil of high classification. Also, if it's "scientific," no one is ever brought to justice, even if the "evil science actions" are uncovered and publicly revealed." (77)

Those who doubt the existence of classified MC technology can draw their own conclusions from several official responses to requests for information on NEM weapons research. Margo Cherney received a letter from the Air Force in 1999 in response to her request for material on a 1970s Air Force project called "Communicating via the Microwave Auditory Effect." In denying her request to declassify this material, the letter said "unauthorized disclosure of the requested information could reasonably be expected to cause damage to national security." (78) Eleanor White received a letter from a member of the New York Assembly in 1998 that said, "Unfortunately, information concerning what was referenced in your letter is highly classified, and I am not at liberty to divulge such information to the general public." (79)

In April 2000, White was able to discover a U.S. Navy contract for Ultrasonic Acoustic Heterodyning Technology with American Technology Corporation. According to the company's own publicity, hypersonic sound technology "can target selected individuals in a group or in a noisy environment and deliver audio to that person." (80) This technology makes possible some of the sound effects White and others experience.

For several years CAHRA founder Cheryl Welsh has been trying to organize a study of 500 alleged experimentees that would include medical and psychiatric evaluations. Many in the CAHRA network are very fearful of doctors because they have experienced terrible abuse in the medical system. Welsh has struggled to convince them to join the study as she diligently networks with EM victims in other countries and raises money to insure the scientific viability of what would become a ground breaking study. People whose symptoms have other causes need to be properly diagnosed and treated. Pretenders and disinformation purveyors among the hundreds of people alleging EM targeting need to be exposed -- either by their refusal to participate in the study or by the objective evaluations of scientific and medical investigators. (81)

### **Civilians Become "the Enemy"**

Many CAHRA members report that their complaints to local police have not gotten serious attention. In some cases this could be explained by collusion between local law enforcement and federal

authorities testing NL weapons and surveillance systems in the community. Crusading Alaskan environmentalist Nick Begich reports a secret agreement between the Department of Defense and the Department of Justice to transfer NL weapons to local law enforcement through the National Institute of Justice. <sup>(82)</sup>

Like an international Paul Revere, Begich has been circling the globe clanging alarm bells to stimulate public debate on civilian control of the military in the post-cold-war era.

"The weaving together of Department of Defense missions with civilian Department of Justice missions is unprecedented. Not since the civil war has the military machinery...been turned against United States citizens...This raises serious questions regarding use of our Department of Defense for domestic police actions, which may be a violation of constitutional law by being in conflict with the narrowly-defined federal use of the military 'for the national defense.'" <sup>(83)</sup>

How did civilians become "the enemy" in peacetime? In a 5/12/99 interview on ABC News, USPA member Lt. Col. John B. Alexander was asked if he saw any domestic applications for NL weapons. "Absolutely," he answered. "In the U.S. today, we have a very large disenfranchised population. The potential for civil disorder is quite high, in my estimation. This is an area in which non-lethal weapons can play a vital role in restoring order, protecting lives and property..."

Alexander directed the Non-Lethal Weapons Laboratory at Los Alamos National Laboratory in the 1980s. He is the same knowledgeable military man who wrote way back in December 1980 that "there are weapons systems that operate on the power of the mind and whose lethal capacity has already been demonstrated.... The psychotronic weapon would be silent, difficult to detect, and would require only a human operator as a power source." <sup>(84)</sup>

Without any any public review process, a joint policy for NL weapons was adopted in 1995. Highest priority was given to developing unspecified technologies "most likely get dual use, i.e., law enforcement and military applications." <sup>(85)</sup> A 1994 draft of the government's NL policy authorized use of nonlethal weapons by our military in support of domestic law enforcement. It chillingly replaced the Cold War concept of an external "enemy" (requiring stringent national-security regulations) with the relatively benign term "adversary," which could apply to anyone, domestic or foreign. "Adversary is used above in its broadest sense," this document says, "including those who are not declared enemies but who are engaged in activities we wish to stop." <sup>(86)</sup>

The confluence of NL and high-tech electronic weaponry can be gleaned from what little is available in the media. The July 7, 1997 issue of U.S. News and World Report reported that the Air Force alone plans to spend more than \$100 million by 2003 to research the "bioeffects" of what it called "exotic" anti-personnel, NL weapons. The ghastly technologies acknowledged in this article include blinding lasers (considered, but rejected for use in Somalia), acoustic or sonic weapons modeled after the Nazi's "vortex" technology (causing nausea, "pain, spasms or even death"), RF weapons that induce epileptic seizures, "undetectable" VLF devices that cause flulike symptoms, nausea and weakness, and "tunable" microwave weapons that can "cook the enemy." <sup>(87)</sup>

In March 2001, the Pentagon went public with a portable people zapper euphemistically called an "Active Denial System." Developed by Ratheon Corporation and other Pentagon contractors for crowd dispersal, this so-called NL weapon "could cook a person's eyeballs" if the operator so desired. <sup>(88)</sup> To its credit, CBS News interspersed footage of huge anti-Vietnam War demonstrations involving hundreds of thousands of Americans in its announcement of this weapon. Comic strip character Pogo's astute and much quoted observation, "We have seen the enemy and they is us" was never more applicable.

"It's war, Jim, but not as we know it," in the 8/3/97 issue of The Scotsman, offers the following

intriguing sentence: "Progress on laser and acoustic technology has been rapid...and a number of weapons are now off the design board and are being tested in secret."

Taxpayers footing the bill for this research have the right to ask: On whom are these weapons being tested and are the subjects protected under the Nuremberg Code, international laws and presidential executive orders?<sup>(89)</sup> Eleanor White appropriately points out, "No government agency will admit to being charged with ethical protection of military and other government classified human test subjects." Could criminal, free-lance experimentation be conducted by private entrepreneurs with security clearance and on-the-job knowledge of how these weapons work?

In 1999 USA Today lifted the veil on a secret administrative court that grants security clearances to employees of defense contractors. "Felons gain access to the nation's secrets" was its provocative headline. "Tens of thousands of military and contractor personnel are cleared each year," it reported. In its study of 1500 decisions by the Defense Office of Hearings and Appeals, the newspaper found clearances were routinely bestowed on drug users, kidnappers, pedophiles, murders, exhibitionists and other convicted sex offenders, chronic liars, and people with histories of violence and/or convictions for criminal fraud involving millions of dollars.<sup>(90)</sup>

### **Psyops Field Testing on Civilians?**

Eleanor White believes the most bizarre harassment she experiences amounts to psychological warfare. The unknown perpetrators, she says, occupy a "shadow government" that includes some of the country's biggest defense contractors and their intelligence operatives. "They are behavior science-oriented," she explains, "in creating severe stress to test our limits." She believes the perpetrators could be retired MK-Ultra employees "who set up shop in private industry away from congressional scrutiny," their paid agents from private security outfits, or even criminal groups who have secured the technology on the military black market. "The original MK-Ultra military/intelligence experimenters were forced to share with the corporate world," she says, "and the sharing has now quite a few branches."

In 1992, the first George Bush Administration added a little-known regulation to its National Industrial Security Program Operating Manual that reads, "Cover stories may be established for unacknowledged programs in order to protect the integrity of the program from individuals who do not have a need to know. Cover stories must be believable and cannot reveal any information regarding the true nature of the contract. Cover stories for Special Access Programs must have the approval of the PSO [Program Security Officer] prior to dissemination."<sup>(91)</sup> This provision is quite alarming. It means that unscrupulous "experimenters," hired by private companies with Pentagon connections, have a green light to "lie by the book." They can easily cover up the abuse of innocent people without any accountability to elected civilian authorities.

"There is no punishment for rogue scientific groups," writes Bearden. "Shockingly, the U.S. government at the highest level has shown...that mass crimes against U.S. civilians, perpetrated by portions of the U.S. scientific community in direct conspiracy and in secret, will likely be condoned. The perpetrators will not be indicted, tried, or convicted." (Emphasis in the original)

He says further that:

"...in the "Big Science community, there can be and there are rogue groups. Lots of them. There is deep cover, deep classification. And there is very probably advanced mind control research and testing, be it legal or illegal. Hopefully, most of it is legal and constrained. However, some of it is almost certain to be illegal and ill constrained."<sup>(92)</sup>

As news of this series disseminated throughout the MC survivor network, academics and independent MC researchers phoned or wrote to offer useful information gleaned from their own

research. One such source is a doctoral student in physics whose interest in neuroscience spans the last decade. I will call him Smith as he does not want his real name used.

Smith believes that covert field testing of NEM weapons is combined with classic surveillance techniques perfected during the Cold War. He directed me to a "spy/counterspy" Web site dissecting FBI methods used to create fear, passivity and immobilization.<sup>(93)</sup> They include constant harassment to build up stress, total discrediting of his/her experiences by driving the target "crazy," then labeling the target as a "paranoid schizophrenic." The intended outcome of this treatment is depression, withdrawal and the target's acquiescence in being controlled. Smith cites the "learned helplessness model" of Martin Seligman, as the operant conditioning used by MC experimenters whose identity is protected in "black" programs.<sup>(94)</sup>

Smith suggests that some alleged experimentees are being used as the "prototypes" of a new controlled life, victims of a psychological warfare operation aimed, not at a foreign "enemy," but at our own citizenry. "Operatives get to train their mind-control and harassment techniques on live prey," he continued, "without fear of adverse consequences from a bungled operation."

He points out that some alleged experimentees, particularly women, are the "ideal candidates" for this kind of operation:

"They live alone, are highly verbal (the more associative one is, the easier it would no doubt be to drive her crazy), individualistic, don't have good family relations, and have obedient relatives, often with connections to the security services. It is easy for federal operatives with top-secret security clearances to paint these people as lunatics in order to be able to torture them with America's tax dollars. Indeed, after the cold war ended, there was a vacuum for surveillance operatives who needed to be doing something useful in order to justify their vast funding. What could be more desirable from a federal operative's point of view than to torture in absolute safety and secrecy a few unfortunate "freaks" with the very latest in black-budget technology?"<sup>(95)</sup>

### **Assassination Mysteries and Mind Control**

Remote viewer David Morehouse exposed the existence of the CIA's Stargate "remote viewing" program in his 1996 book *Psychic Warrior*.<sup>(96)</sup> He revealed that Stargate was a Special Access Program (SAP), which requires the highest level of security clearance for Sensitive Compartmentalized Information.<sup>(97)</sup> NEM technologies would come under the government's NL research apparatus and are probably categorized as SAPs. Morehouse was persecuted as a whistleblower, including involuntary hospitalization and severe psychiatric abuse. The public campaign to discredit him was led by none other than John Alexander, the "father" of NL weapons.<sup>(98)</sup>

Interestingly, Morehouse also told attorney William Pepper that a sniper team of low-level CIA operatives in the U.S. Special Forces was responsible for the assassination of Martin Luther King, Jr. in 1968.<sup>(99)</sup> Earlier installments of this series have touched on how mind control might have been the secret weapon used to commit and cover up the assassinations of President John F. Kennedy, Robert Kennedy and Dr. King. A most provocative and easily accessible article that links MC with these crimes (as well as the assassination of John Lennon and the mass murders in Jonestown, Guyana) was written by Curt Rowlett. It is titled "Project MKULTRA: Did the U.S. Government Actually Create Programmed Assassins?"<sup>(100)</sup>

Was Admiral Boorda -- like the Kennedy brothers and Dr. King -- just the latest political "adversary" marked for extinction by undemocratic shadow institutions operating above and beyond the law?

More than 25 years ago, Senator Frank Church foresaw an abyss of no return. Today Thomas Bearden, a military man who most probably has seen the best and worst of human beings, warns that

unregulated MC technology could be the undoing of our civilization:

"Human beings are still human beings. All the good and evil is still there, regardless of the group. The stage settings change, but the cast of characters and the play never change.

It's sad, but 'twas ever thus. Hidden parts of our own governments -- and other governments throughout the world -- are no different from the old medieval groups, where nobles etc. were always plotting against the king, or using the king's power for their own nefarious end. The rogue groups today are no different from all the scheming and conniving groups that destroyed the Roman Empire. Great empires fall from within, not usually from without!" <sup>(101)</sup> (emphasis in original)

July 2001

Complaint regarding UFOs and staff at RAF Menwith Hill

Dear **Section 40**

I am writing with reference to your e-mail message of 22 October concerning the alleged activities of staff at RAF Menwith Hill in relation to your UFO experiences.

As you will be aware from our previous correspondence, the MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters or to the question of the existence or otherwise of extraterrestrial lifeforms, about which it remains totally open-minded. I should add that to date the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

The MOD examines any 'UFO' sighting reports it receives solely to establish whether they present any evidence that UK airspace has been compromised by hostile or unauthorised aerial activity. Unless there is evidence of a potential threat to the UK from an external military source, and to date no 'UFO' report has provided such evidence, we do not attempt to identify the precise nature of each reported sighting. We believe that it is possible that rational explanations, such as aircraft lights or natural phenomena could be found for them, but it is not the function of the MOD to provide this kind of aerial identification service.

With regard to your allegations concerning "mind control technology" which you believe is being used on you by staff at RAF Menwith Hill, I can assure you that these staff do not have the means by which to conduct any such activities, nor any reason to do so. I believe this has been explained to you by RAF Menwith Hill staff, and there is therefore nothing either they or I can add. If you believe that you are being harassed by anyone, this is a matter for the civilian Police and you may therefore wish to contact your local Police force.

Yours sincerely,

Hi Section 40

Indeed so, and yes it does have it's tentacles in the nazi ideology, I know of a woman at GCHQ called Section 40 who targetted me with behaviour modification technology, as I understand this woman's surname relates to Mengelle as in the nazi death camps. Section 40 has gone to ground. But yes us first, then the cabinet, this country is being invaded covertly with the use of this technology. Only on saturday I was targetted at 0100 by sound effects of screaming and gun fire in my head. I can take it Section 40 then some. But yes I totally agree, there are some in our security services both here and abroad and in other area's who are greatly concerned over the antics of these people, I am sure when it goes crunch many people will come out of the woodwork. I for one Section 40 have been targetted and I will place your article on the site. The UK is the target. I am sick of it.

My blessings to you and thank you very much

 Subject: thanks Section 40 for support  
 Hi Section 40

The activities of staff at Menwith Hill both UK and American deploying mind control technology remains very disturbing for me. This came about as a result of placing a web site on the net which simply demonstrated interaction with UFO's. However as you will read on my site this brought about a reaction from one man in particular at the base who has over a period of years made my life a living hell. This man is known as Section 40 and is in charge of enforcement of silence upon those who have seen things differently in our world. He appears to have an assistant named Section 40 such was their confidence that they would never be challenged they gave their names because they were "my little helpers" they may not be their real names but the abuse thunders on normally despite numerous complaints and so does my stand against it

Sleep deprivation was common along with further abuses of which are sexual harassment while using this technology it has effected me, and at Menwith Hill/GCHQ staff are running riot on the premises with this technology. Where it will lead to next Section 40 not know, but I have managed to conquer my fear, yet remain in a bit of a state my mental health due to all this is giving me cause for concern I am ok but do worry very much. Because of it all. At first I thought they were police and I was in trouble with the law.

Yet I have been targetted because of what appears to be certain paranormal abilities that remain in me I am meant to be super psychic which of great interest to them. I make no claims for this. But there is something not right

The apathy of the UK elected administration appears disturbing to what is clearly a national security threat as they are running riot and the direction the technology is going down maybe one of expansion upon the population. today me, tomorrow the cabinet. I may have got that totally wrong and remain in a position of hope that the authorities will take this seriously. I was deeply shocked by the response of MI5 after clearly highlighting a national security threat. They have indicated they cannot help in this matter, this reflects the disturbing apathetic culture and what I view as a veil of hidden acceptability that people can behave in this way. With this technology in this country. I am currently speaking to my MP regarding a hearing on this. It remains a secure facility at Harrogate a number of phone calls made indicate a further disturbing nature of "it's ok that is what we do tough shit" I have had the phone put down on me before now.

It would appear I rumbled them via a process of elimination but they remain as ever all seeing and so called all powerful among the UK population, and how many more Section 40 are being hit with this technology. I make no apology for the fact that this all came about due to UFO's over my house. I am worried. May I ask permission to publish your paper on my site. I will let you know when the letters are published

My blessings

From: [redacted] Section 40  
Sent: 22 October 2003 16:00  
To: DAS-LAOpsPol1@defence.mod.uk  
Cc: [redacted] Section 40 u-net.com; editor@mediaguardian.co.uk; [redacted] Section 40  
Subject: Further complaint to you regarding Menwith Hill & [redacted] Section 40 to Air Staff 2

Dear Air 2A

I wish to further register my concern, and great disturbance over the harrassment of me with none lethal weapons technology known as RMCT or remote mind control technology being broadcast from Menwith Hill in a clear case of abuse and harrassment because of my UFO experiences or for some other sickening reason. I am extremely disturbed over the culture of acceptable behaviour this appears to be for the individuals doing this, and on Monday the 20th August 2003 experienced further harrassment from them in what can only be described as a sick act designed to once again shock my mind. The MOD is fully aware of my harrassment, fully aware of my experiences and remains in would appear as do others apathetic against what appears to be the action of an unelected junta.

My concern is over the fact that I have reason to suspect this technology known as Zero Evidence Weapons technology is deployed against the population of the UK from Menwith. Further do not be apathetic for to long as this technology may for example target others in authority and that is why it is a clear national security issue.

Every time I phone the base to complain I am met by apathy, could not give a damm, and what could be described as total dross when staff, are, I now believe, fully aware of what is going on the premises of Menwith Hill.

I highlight events involving a male called [redacted] Section 40 in the commanders office, who indeed projects the attitude that it is acceptable to torture the population, he has replaced the phone on me, and also placed me on hold to be met by strange buzzing on the line. When I phoned on the 20th to complain. The base commanders secretary has indicated that "the colonel is talking to the appropriate people" and of course is he hell. To me then it is totally acceptable in their eyes that this conduct continues. Uncehcked unopposed and they need condemming for it. I am appalled by the apathy and apparent total sickening cover up that I am witnessing before me. Be aware this technology is an appalling dawn upon us all.

This morning I was once again awoken by the woman who has constantly sexually harrassed me using this technology, you know of it, and all of you in government know what is going on I feel enraged and wish to hang the lot of them publically for what they have done too me.

How long before other people end up going insane ? how long does the apathy continue ? for just how long do they get away with it ? how many others remained scarred by them or have ended suicidal or in lunatic asylums at the hands of this technology ? Until the whole UK elected administration is hit by them with this technology I wonder ? . Because that is where they are heading for next with this technology control is the game.

I am utterly appalled that this is happening in the UK today.

Yours in disgust

Subject: Hello Section 40@ufo magazine  
Hi Section 40

Just to let you know that my site Section 40 is still being updated but the main thrust of what has been going on is now on it. I had a word with a reader of your magazine a lad up in Skipton who also indicates staff at Menwith Hill have harrassed him.

In this country Section 40 is a cabal of individuals who feel the population should not know the truth regarding the UFO phenomena and decided to use hi tech mind weapons on me. As such I have had a bloody hard time of it and such is the extent of my awareness of this that I was targetted. I hope your magazine will now take a closer look at this and hopefully not take a back seat in what will be in the months ahead a major matter of what I believe is of national importance.

The lack it appears of inaction by the current elected administration in dealing with the threat of what is happening remains extremely disturbing indeed. As do the activities of these highly compartmentalised men and women at the facility.

Blessings

**Subject:** Section 40 & Menwith Hill  
8th Sept 03

Dear Sirs,

I am sure you are aware of my on going saga with what appears to be a wacko squad in operation at Menwith Hill in Harrogate. I am currently updating my site **Section 40** and will be placing on it a diary of persecution listing what these people are doing with mind control technology.

To date I am utterly disgusted that this affair is still on going despite numerous complaints to the authorities regarding them, at 0600 this morning I was awoken from one of them using this technology from my sleep indicating how well they are all doing in lying to others about what they are doing to me. That in itself is typical of these lunatics but it is appalling, it is horrendous & others in this country are being targetted by them. Just what then is going on with these horrendous lunatics, with this technology on tax payers money at Harrogate ?.

I am tired of complaining but will persist until I am reassured these individuals are stopped.

I remain bitterley disgusted at the whole affair.

Section 40

Just for your information, I had a telephone call yesterday from Section 40 of the Police Intelligence Unit at RAF Menwith Hill telling me about a UFO report they had received from a Section 40. She also mentioned Section 40 and that he continued to be a nuisance to staff at Menwith Hill particularly Section 40 who I believe works in the Station Commanders office. Section 40 becoming quiet upset by Section 40 calls and the Police Unit are going to speak to North Yorkshire Police to see if they will visit him. How much effect this will have I am not sure, because apparantly Section 40 has contacted them himself in the past complaining about Menwith Hill staff. I told Section 40 that she may wish to look at Section 40 Section 40 website which talks of his contacts with Menwith Hill and mentions Section 40 by name several times.

If I hear anymore I will let you know.

25 July 2003

I am writing with reference to your letter of 18 July concerning a letter you have received from my staff in the Directorate of Air Staff.

I am sorry you were not satisfied with the letter you received regarding your report of an 'Unidentified Flying Object' sighting and your concerns about Royal Air Force Menwith Hill. In your letter you refer to two jet aircraft from Royal Air Force Leeming which you believe "engaged" an Unidentified Flying Object near Holmes Field on 11 February 2002 and that the pilot filed a report. The Directorate of Air Staff is the focal point within the Ministry of Defence for correspondence and reports about Unidentified Flying Objects and as they explained they received no such reports, either from Royal Air Force aircrew or anyone else, on 11 February 2002. Given the number of Royal Air Force Stations in the area, it is of course possible that you may have observed jet aircraft conducting training manoeuvres in the area.

You also mention the conduct of Royal Air Force Menwith Hill staff who you believe are harassing you; in particular, I understand you are concerned about the activities of a **Section 40** and his wife **Section 40**. I am assured that no one with these names is employed at Royal Air Force Menwith Hill so if you are concerned about the actions of these individuals you may wish to raise the matter with the civilian Police.

There is nothing further that I can add other than to say that the Ministry of Defence remains open-minded about the existence of otherwise of extraterrestrial lifeforms, but to date we know of no definitive evidence which substantiates their existence.

PSO/ACAS  
DAS

LETTER TO CAS FROM Section 40

Section 40

1. PSO/ACAS requested a draft reply for CAS to send to a letter he has received from Section 40. This is attached. By way of background, you may wish to be aware of the following.
2. Section 40 has corresponded with DAS on four occasions, three times between March and May 1997 and then in July this year. He has also contacted RAF Leeming and, since late 2001 he has regularly written to and telephoned the authorities at RAF Menwith Hill. In the last three months Section 40 has made numerous telephone calls to staff of RAF Menwith Hill including the Public Relations Officer, the PA/RAF Commander and the US Colonel's Command Suite. We understand he has also been in touch via e-mail with the US National Security Agency.
3. Section 40 believes that he has been in contact with beings from another planet and because of his specialist knowledge of them, and the Government's wish to keep the existence of extraterrestrial lifeforms from the public, he is under "psychic attack" by individuals from RAF Menwith Hill who are interfering with his mind. He alleges that someone named Section 40 and his wife Section 40 continually harass him and subject him to "remote mind control technology". The Police Intelligence Unit at RAF Menwith Hill have confirmed that neither Section 40 Section 40 have ever been employed there. Section 40 can be quite forceful about his beliefs and staff at RAF Menwith Hill have found some of his telephone calls distressing. For this reason the Police Intelligence Unit have also briefed the North Yorkshire Police.
4. Section 40 says he saw two RAF jets in pursuit of a UFO near his home on 11 February 2002 and that the pilots must have filed a report. We have received no UFO reports from RAF pilots or anyone else for this date from anywhere in the UK.
5. We have explained to Section 40 the MOD's limited interest in reports of UFO sightings, an explanation which he chooses not to accept. He also refuses to believe that staff from RAF Menwith Hill do not (and have no reason to) have him under any kind of surveillance. Therefore, there is little more we can say other than to reiterate our position.

6. I note that CAS intends to reply to **Section 40**. In the event that, given the background and nature of this correspondence (see Enclosure), it is considered more appropriate for you to reply, I have attached a slightly amended draft alongside one from CAS personally.

DRAFT REPLY FROM CAS TO Section 40

Section 40

I am writing with reference to your letter of 18<sup>th</sup> July concerning a letter you have received from my staff in the Directorate of Air Staff.

I am sorry you were not satisfied with the letter you received regarding your report of a 'UFO' sighting and your concerns about RAF Menwith Hill. In your letter you refer to two jet aircraft from RAF Leeming which you believe "engaged" a UFO near Holmes Field on 11 February 2002 and that the pilot filed a report. The Directorate of Air Staff is the focal point within the Ministry of Defence for correspondence and reports about UFOs and as they explained they received no such reports, either from RAF aircrew or anyone else, on 11 February 2002. Given the number of RAF Stations in the area, it is of course possible that you may have observed jet aircraft conducting training manoeuvres in the area.

You also mention the conduct of RAF Menwith Hill staff who you believe are harassing you; in particular, I understand you are concerned about the activities of a Section 40 and his wife, Section 40. I am assured that no one with these names is employed at RAF Menwith Hill so if you

are concerned about the actions of these individuals you may wish to raise the matter with the civilian Police.

There is nothing further that I can add other than to say that the Ministry of Defence remains open-minded about the existence or otherwise of extraterrestrial lifeforms, but to date we know of no definitive evidence which substantiates their existence.

Subject: Your department and all colleagues should read this

PLEASE IGNORE MY FIRST RESPONSE SEND BUTTON PRESSED IN ERROR

Dear Section 40

Thank you very much for your reply to my letter. It is through no fault of your own that many people do not see the true picture of the UFO phenomena your reply is of that nature, and I hasten that it is a reply from one section of a whole system of secrecy.

I am very honoured to know certain information about this subject. Therefore the reply through I stress no fault of your own is in fact not acceptable. This is because the events link into a bigger real time picture to which your department might be kept out of. I felt so strongly about the nature of the reply that I have lodged a formal complaint with the Air Chief Marshall and a letter of complaint with the CDS.

You may note that Admiral Hill Norton was also kept out of the picture as CDS over the reality of this matter. Basically and through no fault of your own the response you have sent is a total lie and cover up and the response does not grasp the gravity or seriousness of the situation. I also add that I can comment with some authority beyond the possible scope of your department. RAF jets from Leeming did engage a UFO craft on the date given, the other jet that was present and chased the UFO in question at one point neck & neck. I can assure you that the existence of ETI and UFO's are a reality to which a very powerful and sinister clique of people intend for key policy makers to be shut out of.

Intelligence suggests a desperate battle is under way to try and keep the lid on it all.

The reach of these corrupt people in our security services is far reaching making your department and others continually lie to the tax payers who have elected them.

To somebody at my level such a reply from your department cannot be accepted.

As an example and I comment from a very high level, President Kennedy was prevented from telling the world, President Eisenhower warned the world in his farewell address regarding the movement of such force, and President Truman expressed concern over the entry of nazi scientists into the US and UK. The denial of this subject to the general population stems from this powerful nazi junta. You have yet to learn this.

In this country many who are involved in the subject wish to speak out. You and your section have failed to grasp the situation at hand, even perhaps I have.

For the past nine years staff at Menwith Hill and at GCHQ have followed a systematic campaign of persecution against me in order for the truth not to come out. The possibility cannot be ruled out that recent death of the government advisor might have a bearing on the fact that he may also have known of the reality of the UFO subject. However that is simple speculation on my part but after seeing what I have seen with them nothing can be ruled out.

You may wish your department to take a look at my news letter at Section 40 where you see a small report on the lengths these people will go to to enforce the silence regarding

24/07/2003

this matter, leaving departments like yourself in a persistent stuck record response.

I wish you well, and hope you will inform all of your colleagues of this e-mail and the persecution you will present on my site. I work at a level slightly beyond yourselves in this subject, you may find in the future your work cut out for you as the reality of UFO's is presented to the population at large.

There remains as ever the threat to UK security from the work of what can only be described as a despot information dictatorship hell bent on keeping people in the dark. The PM of course does as he is told by their bullying tactics.

You have no need to respond to this e-mail but needless to say I hope you will watch events.

Yours sincerely

**Cc:** CAS/PSO; DAS-LA-Ops+Pol1  
**Subject:** UFOs

Sir,

1. I shall be faxing through a copy of a letter that CAS received concerning UFOs in the RAF Leeming area. It is in response to a letter from **Section 40** - DAS(LA) - which was addressed to a **Section 40** dated 14 Jul 03. Clearly **Section 40** has decided not to let the matter rest, hence his letter to CAS. CAS asks that this matter be researched and that a draft response be provided for him to **Section 40**. Given the short time remaining in post for the current Chief, please respond direct to PSO/CAS by **1200 Thur 24 Jul 03**.

2. Many thanks.

Section 40

18th July 03

Air Chief Marshall  
Sir Peter Squire  
Ministry of Defence  
London

Dear Sir Peter,

I refer to the letter enclosed by **Section 40** Directorate of Air Staff dated the 14<sup>th</sup> July 03.

I am expected in view of what has been going on to take this response as acceptable. I am expected to tolerate the outrageous conduct of RAF staffs at Menwith Hill to which I know you are aware of. I find it utterly disrespectful of your organisation to reply in this manner to me knowing that jets from RAF Leeming did engage a UFO craft near the Holmes field. On the date in question 11<sup>th</sup> Feb 02, and you also know as well as I that a report would have been filed by the pilots. That one of the pilots actually signalled to me. The response is lack lustre and reflects a poor image of an organisation that is meant to be the best, may I also add that I am concerned of lack of action and support by you in this matter. It as if the RAF is clearly looking the other way Sir Peter, if not then I would have had your support. I feel that I am part of a massive cover up. I warn you again that the activities I have witnessed during my persecution pose a threat to the security of the UK. You as the RAF going to make a stand with me or be part of the nazi junta that is behind the scenes in the UK.

The reply from **Section 40** is then utter dross.

This letter has been buck passed it is unacceptable.

I question very deeply what is happening and the lack of responses to date. You may wish to check my news page **Section 40**. It is sir with the utmost respect to you appalling what is currently happening.

Yours sincerely

Your Reference

Our Reference  
D/DAS/64/3  
Date  
14 July 2003

Dear **Section 40**

I am writing regarding your letter of 7 June concerning 'unidentified flying objects' which has been passed to me by RAF Leeming. This Department is the focal point within the Ministry of Defence (MOD) for correspondence about UFOs.

First, it may be helpful if I explain that the MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters or to the question of the existence or otherwise of extraterrestrial lifeforms, about which it remains totally open-minded. I should add that to date the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

The MOD examines any reports of UFOs it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity. Unless there is evidence of a potential threat to the United Kingdom from an external military source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each reported sighting. We believe it is possible that rational explanations, such as aircraft lights or natural phenomena, could be found for them, but it is not the function of the MOD to provide this kind of aerial identification service. We could not justify expenditure of public funds on investigations which go beyond our specific defence remit.

With regard to your particular observation, I have looked back through our sighting reports and can confirm that we received no other reports of 'UFO' sightings for 11 February 2002 from anywhere in the UK. We are satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised military aircraft. As for the military aircraft you saw, you may wish to be aware that Selby is close to the Military Air Traffic Zone of RAF Church Fenton and there are a number of other RAF Stations in North Yorkshire. It is therefore likely that you will see RAF jet aircraft training in the area from time to time.

Finally, you enclosed a letter complaining about two individuals who you believe are harassing you. Harassment is a matter for the civil Police, not the MOD, so I can only suggest that you may wish to raise your concerns with your local Police force.

Yours sincerely,

07-06-03

Dear Sir or Madam,

I am making enquires to you regarding an incident that that happened with two RAF jets & unidentified flying objects on the 11-02-02 at 1830 approx over the river Ouse at Selby.

*Nothing reported to us*

One of the jets actually signalled to me at a height of 1000ft circled and flashed lights at me as if to say hello. Near what is known as the local flourmill over looking the Ouse. It then flew over to the field in question. The jet believed to be Tornado's from RAF? Was clearly trying to follow the UFO after a massive bright flash of light in a farmer's field near the river. The pilot was quite aware of my presence and went after the UFO over Barlby. As a military organisation will no doubt at some level be aware of this event.

I am aware that the RAF intercept such UFO craft on a regular basis, and it is a result of this activity that I have been harassed by staff at the Menwith Hill base near Harrogate. It has been a terrible ordeal and is at some level still going on.

I enclose the formal letter of complaint for you, it is not written as a joke or a crank letter but are detailing real events. As I hope you will understand.

I am trying to trace the pilots and I am asking your permission if once located if they will contribute any evidence or support towards the ordeal I have been put through.

I cannot stress highly enough my concern over the events I have witnessed.

You may also visit my site at [Section 40](#) [Redacted]

Yours truly,

Section 40  
[Redacted]

Section 40

THIS IS AN OFFICIAL LETTER OF COMPLAINT

Dear Sirs,

I phoned you on Monday and spoke to you very briefly regarding my very serious concern over activities emitting from this location, and in particular the activities of a man commonly referred to as Section 40, who may also have a wife called Section 40. Section 40 has taken a long time to get to this level after being targeted over a number of years by this man and woman by something known as Zero Evidence Weapons technology also known as synthetic telepathy also known as RMCT or remote mind control technology. The technology is highly advanced and by its very nature denied to the population at large. Section 40 has subjected me to some shocking violations with this technology and still is. As it is a radio transmission source I have traced via a process of elimination to this base. It is therefore feasible to suggest that this man has conducted highly classified intelligence operations of a criminal nature behind the back of those on the premises. It is probable to suggest that at some level the management of the base may also not be aware of his activities which are deeply disturbing in nature.

To explain very simply, in July 1996 I began having strange objects fly over my house these were classed as UFO's or Unidentified Flying Objects. I decided to place a web site on the net called Section 40 about my experiences.

My ability became of great interest to my harasser who commenced a campaign of persecution using this technology, this included awoken from sleep on a regular basis having my genitals electrocuted, having sound effects put on me, and in January 2002 a clear attempt was made to shatter my mind with this hardware. The idea hinges on the denial of these operations and that they do not exist. However in the field of what goes on with UFO objects I am very familiar and cannot be hoodwinked by a policy of simple denial.

Section 40 gave himself the status of a police officer, has masqueraded as MI5, the police and the army, he has followed me into a local pub, and clearly the man is highly unstable. This is because of the Unidentified Flying Objects that started to come over my house. Section 40 is also taking a curious bent in the pursuit of obtaining a child from me, which he is of the opinion is super psychic.

This man & his wife lock into an un-elected power bloc, which is in operation at the base. Silence is essential. It is possible that across the UK other people have been targeted by this technology. These activities provide a major national security threat to the UK a curious nazi/satanic signature is given off during the course of his mind invasion upon me. This man in simple terms has given me hell, has tortured me and I am sure any nazi death camp would be pleased to have him.

This in turn leads me to the activities of his possible wife called **Section 40** also appears to have a very curious and what could be called de-ranged side to her. Both of these individuals are in violation of article 19 of the human rights code. But their callous disregard and continued abuse means they will not give a dam. On one occasion he told me "It's my word against yours there is really nothing we can do". The violations made by his wife are sexual in nature and have been deployed also using this RMCT technology from these premises. I hasten to add that Downing Street is fully aware of these lunatics on your premises and I am part of the operation to confront these individuals. Who I stress once again is causing a major national security problem with this technology.

The knowledge of my liaison with UFO's and the information gleaned from them is fully known by others outside of your premises and by certain individuals inside your base who wish to enforce their role as an un-elected silent police force. It is therefore paramount for certain members of staff to form a policy of total denial as if nothing has happened. This is serious criminal activity with a technology that is denied.

It is important therefore that the complainant on the receiving end of the abuse is labelled a complete lunatic. So that they may continue as they have always done to get clean away with it.

However there are certain levels of information that I know that this man also knows regarding UFO's, I am therefore a civilian with a working knowledge of the subject outside an unknowing public with a clearance of the same information level that he knows about these objects. I basically match him and was never meant to know.

In very simple terms I have ability, which is of great interest to him, in that if I see an unidentified flying object I can see and hear it. This ability is very rare and acute and has been part of his unsanctioned operation from your premises, which included behaviour modification in order to obtain this child by deceit without anyone knowing. No explanation has ever been given as to why I should be hounded to the level I have by these individuals but in very simple terms I have suffered horribly at their hands, even as you receive this letter it will indeed be business as usual.

These people remain a clear and present danger to the population and they are operating from your premises.

This letter only touches the tip of the iceberg but their central focus and strategy is to:

Enforce silence of the nature of UFO's

Enforce Silence over any individual who know the true nature of UFO craft using advanced mind control technology.

To be unaccountable to nobody

To threaten anyone who should enquire regarding there actions:

These methods use a term known as

Zero Evidence Weapons Technology

To make the target go insane, suffer from depression and at worst commit suicide

In my case to attempt behaviour modification, in order to obtain what is believed to be a child that has this ability. To back that up with a system of warping the mind and making sure the target becomes totally reliable upon them.

To shut off from all parts of personnel and operations that do not need to know and keep the operation quiet at all costs.

On Saturday 10-05-03 at 0545 approx I was awoken to the clear audio, and visual sounds emitting from your premises, by **Section 40**. A correct and possible term for her is a "neuro controller" who subjected me to the horrendous sounds of screaming and gunfire to which she terminated the event with the sentence "that was fun".

I find this woman a pillar of utter depravity and what is more, I understand children are present on the base in the presence of these jobs that are having some great fun with me from your premises. I have shortened nearly several years of persecution to a few pages however I cannot stress highly enough that these people who are in operation from these premises and are sanctioned by somebody somewhere made my life a living hell.

My disgust

**Section 40**
