PART D: Derivative Classification Decisions
NASA's numbers of derivative classification (DC) decisions has been reduced from previous years. Through continued performance of the Agency-level Integrated Security Functional Review Program, expanded involvement of the NASA Information Assurance/Industrial Security Program Manager and Center Information Security Specialists, and enhanced training at centers, NASA centers are doing a better job reviewing and reporting documents for discrepancies. NASA Centers have a better understanding of what to report and no longer account for derivative classification decisions made by other organizations.

PART F: Mandatory Declassification Review Decisions in Pages
Totals for mandatory declassification for this reporting period declined significantly from the previous year due to the special project being completed in 2014. The Internal Mandatory Declassification Review request in 2014 of 94 boxes of material added significantly to the reported numbers for 2014. NASA has placed significant emphasis in bolstering its training to meet the demands of automatic declassification standards and help reduce NASA's inventories in the coming years.

PART J: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Sampling Period: The NASA sampling technique used was a 4-week sampling period. Classifiers were instructed to add up the number of derivative classification actions for a particular 4-week period. Then multiply by 13 to get the total derivative classification actions for a 52-week fiscal year.

Part D: NASA uses computer code to generate a classified file as part of an analysis. Some "runs" may create upwards of 10s of thousands of files in a single session, each one is classified. However, less than 100 of these derivative decisions are considered "final products." We have reported only the final products in part D.

Part G: Includes 58524 pages declassified in the IRC and 5298 pages declassified in referrals to NASA from the Presidential Libraries.
